the new edition of a comprehensive treatment of monetary economics including the first
extensive coverage of the effective lower bound on nominal interest rates this textbook presents
a comprehensive treatment of the most important topics in monetary economics focusing on the
primary models monetary economists have employed to address topics in theory and policy
striking a balance of insight accessibility and rigor the book covers the basic theoretical
approaches shows how to do simulation work with the models and discusses the full range of
frictions that economists have studied to understand the impacts of monetary policy for the
fourth edition every chapter has been revised to improve the exposition and to reflect recent

research the new edition offers an entirely new chapter on the effective lower bound on nominal interest rates forward guidance policies and quantitative and credit easing policies material on the basic new keynesian model has been reorganized into a single chapter to provide a comprehensive analysis of the model and its policy implications in addition the chapter on the open economy now reflects the dominance of the new keynesian approach other new material includes discussions of price adjustment labor market frictions and unemployment and moral hazard frictions among financial intermediaries references and end of chapter problems allow readers to extend their knowledge of the topics covered monetary theory and policy continues to be the most comprehensive and up to date treatment of monetary economics not only the leading text in the field but also the standard reference for academics and central bank researchers

paul s letter to believers in jesus at rome has always been very highly regarded within the christian church playing a central role in the formulation and proclamation of christian doctrine yet despite its status in the church and its importance for christian thought life and proclamation romans is not a simple writing it is one of the most difficult new testament letters to analyze and interpret in this commentary prominent new testament scholar richard longenecker offers a clear analysis of romans that builds on the work of past commentators while still being informed by significant studies and insights of interpreters today his analysis is critical exegetical and constructive but pastoral in its application longenecker also sets a course for the future that will promote a better understanding of this most famous of paul s letters and a more relevant contextualization of its message

this book is perhaps one of the most misunderstood works of catholic theology of our time critics contend that von balthasar espouses universalism the idea that all men will certainly be saved yet as von balthasar insists damnation is a real possibility for anyone indeed he explores the nature of damnation with sobering clarity at the same time he contends that a deep understanding of god s merciful love and human freedom and a careful reading of the catholic tradition point to the possibility not the certainty that in the end all men will accept the salvation christ won for all for this all embracing salvation von balthasar says we may dare hope we must pray and with god s help we must work the catholic church s teaching on hell has been generally neglected by theologians with the notable exception of von balthasar he grounds his reflections clearly in sacred scripture and catholic teaching while the church asserts that certain individuals are in heaven the saints she never declares a specific individual to be in hell in fact the church hopes that in their final moments of life even the greatest sinners would have repented of their terrible sins and be saved sacred scripture states god desires all men to be saved and to come to the knowledge of the truth for there is one god and there is one mediator between god and man the man christ jesus who gave himself as a ransom for all 1 tim 2 4 5

gagnon offers the most thorough analysis to date of the biblical texts relating to homosexuality he demonstrates why attempts to classify the bible s rejection of same sex intercourse as irrelevant for our contemporary context fail to do justice to the biblical texts and to current scientific data gagnon s book powerfully challenges attempts to identify love and inclusivity with affirmation of homosexual practice the most sophisticated and convincing examination of the biblical data for our time j lrgen becker professor of new testament christian albrechts university

israel and the nations paul's gospel in the context of jewish expectation provides various perspectives of leading contemporary scholars concerning paul's message particularly his expressed expectation of the end time redemption of israel and its relation to the gentiles the non jewish nations in the context of jewish eschatological expectation the contributors engage the increasingly contentious enigmas relating to paul's jewishness had his perception of living in a new era in christ and anticipating an imminent final consummation moved him beyond the bounds of what his contemporaries would have considered judaism or did paul continue to think and act within judaism

this study addresses the centrality of christ in paul's thought recognizing at the same time that he does not express the meaning of christ as an existing teaching christ as a person not a teaching determines paul's thinking for himself and in his reasoning with his readers christ comes to expression in paul as the explication of the fundamental reality for himself and for his readers he develops his thoughts about christ in each case anew as expressions of the lord who determines his life and the lives of his readers in his reasoning with his readers he expects them to become aware of christ as the one who determines them in their new lives as believers

these thirteen essays combine classical scholars interest in theatrical production with a growing interdisciplinary inquiry into the urban contexts of literary production taking as their departure point the annual comic competitions at the athenian dramatic festivals the contributors examine how the polis as a place a political entity a specific social organization and a set of ideological representations was enacted on stage from the middle of the fifth century b c through the fourth applying a variety of critical approaches to athenian comedy these essays are grouped around three broad categories utopianism fissures in the social fabric and the new polis of fourth century comedy the contributors explore the sociopolitical and material contexts of the works discussed and trace the genre into the fourth century when it underwent profound changes simultaneously a study of classical greek literature and an analysis of cultural production this

collection reveals how for two centuries athens itself was transformed staged as comedy and ultimately shaped by contemporary material social and ideological forces the contributors are elizabeth bobrick gregory crane gregory dobrov malcolm heath jeffrey henderson timothy p hofmeister thomas k hubbard david konstan heinz g nther nesselrath frank romer ralph m rosen niall w slater and john wilkins a unc press enduring edition unc press enduring editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print these editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

the substantially revised fourth edition of a widely used text offering both an introduction to recursive methods and advanced material mixing tools and sample applications recursive methods provide powerful ways to pose and solve problems in dynamic macroeconomics recursive macroeconomic theory offers both an introduction to recursive methods and more advanced material only practice in solving diverse problems fully conveys the advantages of the recursive approach so the book provides many applications this fourth edition features two new chapters and substantial revisions to other chapters that demonstrate the power of recursive methods one new chapter applies the recursive approach to ramsey taxation and sharply characterizes the time inconsistency of optimal policies these insights are used in other chapters to simplify recursive formulations of ramsey plans and credible government policies the second new chapter explores the mechanics of matching models and identifies a common channel through which productivity shocks are magnified across a variety of matching models other chapters have been extended and refined for example there is new material on heterogeneous beliefs in both complete and incomplete markets models and there is a deeper account of forces that shape aggregate labor supply elasticities in lifecycle models the book is suitable for first and second year graduate courses in macroeconomics most chapters conclude with exercises many exercises and examples use matlab or python computer programming languages

few aspects of american military history have been as vigorously debated as harry truman s decision to use atomic bombs against japan in this carefully crafted volume michael kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the united states and japan during the closing days of world war ii kort opens with a summary of the debate over hiroshima as it has evolved since 1945 he then provides a historical overview of thye events in question beginning with the decision and program to build the atomic bomb detailing the sequence of events leading to japan s surrender he revisits the decisive battles of the pacific war and the motivations of american and japanese leaders finally kort examines ten key issues in the discussion of hiroshima and guides readers to relevant primary source documents scholarly books and articles

introducing romans a kind of introduction ahead of time to richard longenecker s forthcoming commentary on romans is a major achievement in its own right the fruit of at least fifty years of scholarship on the apostle paul and on romans in particular it can stand alone as an indispensable handbook for anyone venturing to write a commentary of one s own or for anyone who wants to teach or understand that classic letter above all longenecker succeeds admirably in putting the many issues surrounding romans in the broadest possible historical context encompassing not just recent fashions but the legacy of centuries seasoned scholars and

beginning students alike have every reason to be grateful j ramsey michael's missouri state university

this book retraces the history of macroeconomics from keynes's general theory to the present central to it is the contrast between a keynesian era and a lucasian or dynamic stochastic general equilibrium dsge era each ruled by distinct methodological standards in the keynesian era the book studies the following theories keynesian macroeconomics monetarism disequilibrium macro patinkin leijonhufvud and clower non walrasian equilibrium models and first generation new keynesian models three stages are identified in the dsge era new classical macro lucas rbc modelling and second generation new keynesian modeling the book also examines a few selected works aimed at presenting alternatives to lucasian macro while not eschewing analytical content michel de vroeij focuses on substantive assessments and the models studied are presented in a pedagogical and vivid yet critical way
