a unique encyclopedia of competitive rifle pistol shooting

the ultimate book for the gun enthusiast and the historian alike american pistol shooting is a textbook of old world techniques for successful shooting the author major william d frazer was an incredibly accomplished marksman in his day earning the us army s distinguished marksman badge in 1922 almost entirely self taught frazer knew that the world needed a comprehensive book on pistol shooting technique and he was the man to write that book brilliantly detailed with sections on caring for your pistols trigger control defensive shooting and quick drawing and

even shooting psychology there is something here for everyone first published in the early 1900s almost all of american pistol shooting is still relevant today even despite the massive technological changes that have swept across the face of the gun industry the techniques described will help anyone up their game and zero in on their aim whether practicing alone in the backyard or practicing at the shooting range major william d frazer s book is a must have for anyone interested in the sport of shooting and the history of the gun skyhorse publishing is proud to publish a broad range of books for hunters and firearms enthusiasts we publish books about shotguns rifles handguns target shooting gun collecting self defense archery ammunition knives gunsmithing gun repair and wilderness survival we publish books on deer hunting big game hunting small game hunting wing shooting turkey hunting deer stands duck blinds bowhunting wing shooting hunting dogs and more while not every title we publish becomes a new york times bestseller or a national bestseller we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home

there is now no use learning revolver shooting that form of pistol is obsolete except in the few instances where it survives for target shooting or is carried for self defence just as flintlock muskets even now survive in out of the way parts of the world if a man tries to defend himself with a revolver against another armed with an automatic pistol he is at a great disadvantage the automatic is more accurate than a revolver as the blow back does not vary as much as does the escape of gas past the cylinder in a revolver the bullet in the revolver has to jump into the cylinder whereas in the automatic it is already fitted up against the rifling before being fired the single shot pistol is the most accurate of any there being no escape of gas the automatic has not only a much longer range than the revolver although the popular idea that it can be shot accurately at a thousand yards or more is nonsense but it cocks itself instead of having to be cocked by the thumb or trigger finger cocking by trigger pull is such a strain on not only the trigger finger but the whole hand that after a few shots good shooting cannot be made i won all my rapid firing revolver competitions using the single action and cocking with the thumb as this rested my trigger finger with the automatic cocking is unnecessary and with its lighter recoil good scores in rapid firing are very much easier to make the penetration of the nickel coated automatic bullet propelled by its big charge of nitro powder is very great a man brought me a pistol proof cuirass to test i put a bullet at twelve yards clean through it and then through two bullet proof ones placed one behind the other i used a regulation u s 45 automatic pistol this was before the war the inventor was disappointed he had experimented only with revolvers shooting soft leaden bullets and these his cuirass had stopped unfortunately in its present comparatively imperfect development the automatic is the most dangerous firearm of all pistols for a novice to handle the long barrel of a rifle can be struck aside if a beginner swings it round and points it at the instructor or a nearby spectator but the short

barrel of a pistol is easily pointed at and with difficulty brushed aside by the unfortunate person standing near a brandishing and flourishing man who is learning to shoot in spite of all warnings even those who ought to know better do this swinging about in fact it is the recognized way of handling a pistol according to reporters they always say so and so was brandishing a pistol if he happens to be armed

when handguns afield was first published in 1961 hunting with a handgun was in its infancy surely settlers and cowboys of the 19th century would have used a handgun on wild game from time to time to fill the campfire stewpot but as far as using a handgun for hunting as a pastime this sport was not yet widely recognized author jeff cooper expertly summarizes the various aspects of hunting with handguns in the few dozen pages of this volume handguns cartridges holsters and shooting small and large game are all thoroughly described and explained here if the average handgun shooter follows the advice of this book most of which is still relevant today he will be prepared to hunt game with a pistol the man who wants to take game with a pistol must realize that if he is to be successful he must be good he must be a good woodsman a good hunter a good sportsman and an extremely good shot because he cannot reach out as with a rifle he must be able to get right up on his target and this takes both knowledge of game and much stalking skill the more open the country the more skill is required in thick brush the pistol is handier than the rifle and the problem becomes one of moving target marksmanship the pistol hunter is more agile than the rifleman since he has both hands free to use in climbing or parting brush for the same reason he may be quieter these things help him in very rough heavily wooded terrain in fact every aspect of hunting is easier for the handgunner than for the rifleman except hitting therefore marksmanship is the big problem jeff cooper
