outsourcing is nothing new brick and mortar businesses have been doing it for years but what may surprise some people is that online entrepreneurs can also use this common business strategy with a great deal of effect of course outsourcing is not ideal for everyone but by understanding the basics of what outsourcing is how it works and how it can benefit a business it is possible to make an informed decision about whether the approach is right for your business in the broadest sense outsourcing is an approach to task management that involves utilizing resources that are outside the direct control of the company to handle tasks that are relevant

to the operation and success of the business generally this involves contracting with a service provider to handle the specific function for a specific period of time and with guidelines that are agreeable to both parties in some cases the service may be granted limited powers to act in the stead of the client if that is necessary to perform the contracted tasks the main function of outsourcing is often to allow employees to focus on company operations that may be more detailed and directly related to the growth of the business daily housekeeping issues are handled by outside firms who do the job at a fraction of what it would cost for a full time staff to accomplish the same tasks this helps to minimize the amount of clerical support that is needed in house and thus keep employee related expenses relatively low

one of the most significant techniques to which companies and organizations have turned to improve service delivery and reduce costs has been outsourcing over the last 10 years almost any process has been successfully outsourced but during that period there have been failures too projects that never realised their objectives or that had unforeseen impact on business global outsourcing strategies is a state of the art guide to the best lessons to be learned for successfully implementing and outsourcing projects or for revisiting existing operations the 22 chapters explore some of the new areas for outsourcing after traditional targets such as it and finance information is provided on the different facets of the outsourcing process such as contract negotiation the risks involved in outsourcing the need for service level agreements the critical requirements needed to build and sustain outsourcing relationships and ethical supply chain issues there are also sections exploring the impact of outsourcing on organizational structures the long term effects legal issues management control and inter firm relationships as well as case studies from both the public and private sector on

the practical side of outsourcing the book will appeal to practitioners and researchers alike this is a must have guide for any organization approaching outsourcing as a global or local strategy and for those organizations now reviewing or developing their outsourcing partnerships
