Confirmation Bias The tendency to seek out information that confirms preexisting beliefs and ignore contradictory evidence is a classic example For instance someone who believes climate change is a hoax may only read articles supporting that view dismissing scientific consensus

Availability Heuristic We overestimate the likelihood of events that are easily recalled often due to their vividness or recent occurrence Fear of flying despite statistically being safer than driving is fueled by the availability heuristic plane crashes are highly publicized and 2 memorable

Representativeness Heuristic We judge the likelihood of something based on how well it matches a prototype If someone fits our stereotype of a librarian we might assume they are quiet and introverted even if thats not necessarily true
