work a decade in the writing about family in *Far from the Tree* Andrew Solomon tells the stories of parents who not only learn to deal with their exceptional children but also find profound meaning in doing so. Solomon's startling proposition is that diversity is what unites us all. He writes about families coping with deafness, dwarfism, Down syndrome, autism, schizophrenia, multiple severe disabilities, with children who are prodigies, who are conceived in rape, who become criminals, who are transgender, while each of these characteristics is potentially isolating. The experience of difference within families is universal, as are the triumphs of love. Solomon documents in every chapter all parenting turns on a crucial question: to what extent should parents accept their children for who they are, and to what extent should they help them become their best selves. Drawing on forty thousand pages of interview transcripts with more than three hundred families, Solomon mines the eloquence of ordinary people facing extreme challenges. Whether considering prenatal screening for genetic disorders, cochlear implants for the deaf, or gender reassignment surgery for transgender people, Solomon narrates a universal struggle toward compassion. Many families grow closer through caring for a challenging child; most discover supportive communities of others similarly affected; some are inspired to become advocates and activists. Celebrating the very conditions they once feared, woven into their courageous and affirming stories is Solomon's journey to accepting his own identity, which culminated in his midlife decision, influenced by this research, to become a parent. Elegantly reported by a spectacularly original thinker, *Far from the Tree* explores themes of generosity, acceptance, and tolerance, all rooted in the insight that love can transcend every prejudice. This crucial and revelatory book expands our definition of what it is to be human.

In *Incurable Me*, a maverick physician brings transparency to some of medicine's most closely guarded secrets as he establishes a link between commerce and medical research. K. P. Stoller also explains how to treat some of the most worrisome diseases and conditions afflicting humans today, including Lyme disease, brain trauma, dementia, and autism. Dr. Stoller maintains that the best evidence in medical research is not incorporated into clinical practice unless the

medical cartel has the potential to make large amounts of money promoting the results of the research stoller takes his provocative argument a step further maintaining that if specific research conflicts with a powerful entity's financial interests the likely result will be an effort to suppress or distort the results stoller cites numerous examples including corporate influence on gmo labeling and public health stoller also explores how revolving door employment between the centers for disease control and large pharmaceutical companies can affect research results as well as our health written in an accessible style that is thoroughly appropriate for a lay audience incurable me is a must read for anyone interested in the state of modern medicine

vax facts is a one stop shop for all the information parents and guardians need to make an informed choice about childhood vaccinations the challenge for most who are wrestling with whether to give a vaccine is a lack of understanding about what information they really need to make an informed decision written by a pediatrician who witnessed the difference over decades in the health outcomes of the vaccinated partially vaccinated and unvaccinated children in his practice vax facts will enlighten parents and guardians and provide the information needed for informed consent covering each of the vaccines recommended by the cdc and doctors from pregnancy through the teen years this detailed guide breaks down the ingredients the lack of safety testing and the side effects and risks of the vaccines with the help of simple data tables that compare the rates of death from the diseases for which we have vaccines and the rates of death from the vaccines themselves parents and guardians can easily decide what's right for their children with almost four million births per year in the united states this useful resource will resonate with all who are pregnant or considering pregnancy and all parents grandparents aunts and uncles who are considering whether vaccination is appropriate for a family member or loved one at the end of each chapter just a mom coauthor deede hooover shares personal stories and reflections that allow readers to connect with the information this information packed guide is for all those asking should i get my child vaccinated who want more than just a yes no answer after reading vax facts parents and guardians

will be able to decide with confidence whether vaccination is the right choice for their loved one
