kim offers an accessible interdisciplinary textbook using systems theory as a framework to stimulate discussion about how the social sciences develop understanding of society and its evolution it promotes an integrated view of the

social sciences by proposing politics economics administration and community as the core areas of society and explains their characteristics how they are moved by what kind of systems and how they have evolved through their interrelationships this book explains how the major areas of operate on certain structures and principles and how they have developed while maintaining certain relationships with each other the beauty of the entire field of social sciences lies in understanding society and social sciences as a whole and the relationships that intertwines it it is unique in that it approaches social science from an eastern perspective using traditional eastern thought and social phenomena as examples in its explanations and proposes a methodology for understanding society that s different to traditional social science textbooks which use the application of natural science methodology and statistics to understand society designed for a wide range of students in sociology politics and economics encouraging interdisciplinary thinking and understanding it is written with citations of classical writings by social scientists including locke rousseau hobbes mill marx engels proudhon smith weber durkheim buber myrdal habermas popper hayek putnam and others through this book readers can gain panoramic insights into how the works of these social scientists are interconnected

property law in the society of equals is an account of the property law and its justificatory foundations it begins with the common worry that property is an inegalitarian institution and shows that contrary to the worry property is actually an essential constituent of a society of equals property law is the solution to the problem of yours and mine a moral problem about the impossibility of our relating to one another on terms of equality absent an institution that allows us to have things as our own this understanding of property not only shows why property is required for us to have equal relations it also provides a distinctive perspective on the ways in which our current institutions of property are defective from their own internal point of view and require radical reform the book uses this abstract account to explain contemporary property law the book explains private law doctrines including trespass licence nuisance acquisition transfer tenancy the law of servitudes it also illuminates the boundaries between property rights and personal rights and between property rights and contract rights and explores various liminal cases of property through that lens in addition the book critiques property internally showing how property s justification requires a state to provide homes to all of its subjects and showing how other parts of the public law of property including various forms of land use regulation should be understood as part of the law of property rather than external limitations on it

property and community fills a major gap in the legal literature on property and its relationship to community the essays included differ from past discussions including those provided by law and economics by providing richer accounts of

community by and large prior discussions by property theorists treat communities as agglomerations of individuals and eschew substantive accounts of justice favoring what Charles Taylor has called procedural conceptions these perspectives on ownership obscure the possibility that the community might have a moral status that differs from neighboring owners or from non owning individuals this book examines a variety of social practices that implicate community in its relationship to property these practices range from more obvious property based communities like Israeli kibbutzim to surprising examples such as queues aspects of law and community in relationship to legal and social institutions both inside and outside of the United States are discussed Alexander and Peñalver seek to mediate the distance between abstract theory and mundane features of daily life to provide a rich textured treatment of the relationship between law and community instead of defining community in abstractly theoretical terms they approach the subject through the lens of concrete institutions and social practices in doing so they not only enrich our empirical understanding of the relationship between property and community but also provide important insights into the concept of community itself
