science fiction and psychology explores science fiction literature's varied use of psychological discourses from the late nineteenth century to the end of the twentieth. the readings explore the varied employment in science fiction of ideas from five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential humanism and cognitivism and conclude by examining psychology's use of science fiction.

this eye-opening book deserves a spot on the bookshelves of anyone who not only enjoys collecting but also has a great interest in all facets of the history of our hobby. toy soldier collector science fiction, as the name suggests, is the combination of science and fantasy. in addition to a literary form, it also encompasses film, tv, comics, toys and our beloved toy astronauts or other figures such as aliens, monsters and other playable genres. the term science fiction was coined by publisher hugo gernsback around the first decades of the last century to refer to the predominantly space adventures covered in his magazines. space invaded radio, cinema, tv and consequently, for a long time, toy figurines were predominantly space-related. later evolving into other themes, this lavishly illustrated book covers both the history of literary science fiction, following in the footsteps of contemporary official criticism, and toy figurines inspired by science fiction. you will also find several other themes such as the link between science fiction figures and cinema, radio, tv, comics and more. luigi toiatì offers to both guide the reader on an often nostalgic walk through science fiction in all its various forms and to describe the figurines and brands associated with it.

the medical humanities are becoming increasingly important as their first wave is interrogated by a critical approach that aims to uncover the wider possibilities of the field. in conversation with this debate, this volume explores the ways in which science fiction studies can contribute to such discussions. science fiction challenges techno-optimism and offers a non-realist avenue for the expression of illness experience. science fiction also estranges its readers from their societies and the medical possibilities inherent in those societies, inviting consideration of how medicine may be complicit with or opposed to other structures of power by engaging these concerns. this companion volume offers a unique viewpoint on the power of the future to shape the present.

science and science fiction have become inseparable, with common stories interconnected, thought experiments and shared language. this reference book lays out that relationship and its all-but-magical terms and ideas. those who think seriously

about the future are changing the world reshaping how we speak and how we think this book fully covers the terms that collected clarified and crystallized the futurists ideas sometimes showing them off sometimes slowing them down and sometimes propelling them to fame and making them the common currency of our culture the many entries in this encyclopedic work offer a guided tour of the vast territories occupied by science fiction and futurism in his foreword david brin says provocative and enticing filled with huh moments and leads to great stories that describes this volume

science fiction and anticipation utopias dystopias and time travel presents ten chapters discussing themes related to time travel utopias and dystopias in science fiction novels published in america and europe between the 18th and 20th century these themes include social progress freedom and human rights technological advances and the issues of ethics racism sexism censorship and slavery the contributors analyze novels such as the year 2440 published in 1771 paris in the twentieth century written by jules verne blake or the huts of america by martin robinson delany the amphibian man by alexander belyaev heart of a dog by mikhaïl bulgakov ashes ashes by rené barjavel the machine stops by e m forster morel s invention by adolfo bioy casares and writers of spanish argentinian english and french fictions such as george orwell eduardo ladislao holmberg and leopoldo antonio lugones argüello this book notably presents their sources and influence the accuracy of their predictions and their relevance in our very unstable world

this volume explores italian science fiction from the nineteenth century to the twenty first covering literary texts films music and visual works by figures as diverse as maria rosa cutrufelli peter kolosimo primo levi antonio margheriti gilda musa and roberto vacca it broadens the horizons of both italian studies and the environmental humanities by addressing a long neglected genre and expands our understanding of relations between the ecological the imaginary and the sociopolitical the chapters draw on a variety of methodological frameworks including animal studies ecocriticism ecofeminism eco media studies energy humanities and posthumanism the reader will gain insights into consequential topics such as anthropocentrism speciesism ecomodernist thought environmental justice struggles at the planetary and regional level non human and new materialist ontologies utopian dystopian philosophies and prospects for transitioning beyond the crisis of petro modernity through the construction of post depletion futures open access versions of the introduction and six of the book chapters are available on the liverpool university press website

from its beginnings science fiction has experimented with imperialistic scenarios of alien invasion extraterrestrial exploitation xenophobia and colonial conquest in science fiction and empire patricia kerslake brings contemporary thinking about postcolonialism and imperialism to bear on a variety of classic sci fi novels and films

including the war of the worlds stanislaw lem's solaris and star wars the first book to identify the consequences of empire in science fiction kerslake's study is a compelling investigation of the political ramifications of how we imagine our future science fiction and empire is thought provoking and insightful the kind of large scale postcolonial work that science fiction has needed for quite some time science fiction studies

this study considers the recent surge of science fiction narratives from the postcolonial third world as a utopian response to the spatial political and representational dilemmas that attend globalization

this is the first of three volumes that chart the history of the science fiction magazine from the earliest days to the present this first volume looks at the exuberant years of the pulp magazines it traces the growth and development of the science fiction magazines from when hugo gernsback launched the very first amazing stories in 1926 through to the birth of the atomic age and the death of the pulps in the early 1950s these were the days of the youth of science fiction when it was brash raw and exciting the days of the first great space operas by edward elmer smith and edmond hamilton through the cosmic thought variants by murray leinster jack williamson and others to the early 1940s when john w campbell at astounding did his best to nurture the infant genre into adulthood under him such major names as robert a heinlein isaac asimov a e van vogt and theodore sturgeon emerged who along with other such new talents as ray bradbury and arthur c clarke helped create modern science fiction for over forty years magazines were at the heart of science fiction and this book considers how the magazines and their publishers editors and authors influenced the growth and perception of this fascinating genre

james gunn one of the founding figures of science fiction scholarship and teaching wrote in 1951 what is likely the first master's thesis on modern science fiction portions were in the short lived pulp magazine dynamic but it has otherwise remained unavailable here in its first full publication the thesis explores many of the classic golden age stories of the 1940s and the critical perspective that informed gunn's essential genre history alternate worlds and his anthology series the road to science fiction the editor's introduction and commentary show the historical significance of gunn's work and its relevance to today's science fiction studies

this book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected british eco science fiction novels these novels are john christopher's the death of grass 1956 j g ballard's the drought 1965 brian aldiss's

earthworks 1965 and John Brunner's *The Sheep Look Up* 1972 all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious. This book examines how even the smallest damage caused by human beings to the environment negatively affects them, other living beings and the ecosystem they need to live and flourish in conjunction with these factors and conditions that push characters in the novels to ignore and harm the environment. It is also scrutinised while examining how and why the environmental problems in the novels have arisen. It is evaluated whether the authors propose solutions to these problems and if so what they are.
