between 1935 and 1942 photographers for the new deal s resettlement administration farm security administration fsa captured in powerfully moving images the travail of the great depression and the ways of a people confronting radical social change those who speak of the special achievement of fsa photography usually have in mind such white icons as dorothea lange s migrant mother or walker evans s alabama sharecroppers but some six thousand printed images a tenth of fsa s total included black figures or their dwellings at last nicholas natanson reveals both the innovative treatment of african americans in fsa photographs and the agency s highly problematic use of these images once they had been created while mono dimensional treatments of blacks were common in public and private photography of the period such fsa photographers as ben shahn arthur rothstein and jack delano were well informed concerning racial problems and approached blacks in a manner that avoided stereotypes right wing as well as left wing in addition rather than focusing exclusively on fsa approved agency projects involving blacks politically the safest course they boldly addressed wider social and cultural themes this study employs a variety of methodological tools to explore the political and administrative forces that worked against documentary coverage of particularly sensitive racial issues

moreover natanson shows that those who drew on the fsa photo files for newspapers magazines books and exhibitions often entirely omitted images of black people and their environment or used devices such as cropping and captioning to diminish the true range of the fsa photographers vision

to meet the global food demand of an increasing population food production has to be increased by 60 by 2050 the main production constraints such as climate change biotic stresses abiotic stresses soil nutrition deficiency problems problematic soils etc have to be addressed on an urgent basis more than 50 of human calories are from three major cereals rice wheat and maize the harnessing of genetic diversity by novel allele mining assisted by recent advances in biotechnological and bioinformatics tools will enhance the utilization of the hidden treasures in the gene bank technological advances in plant breeding will provide some solutions for the biofortification stress resistance yield potential and quality improvement in staple crops the elucidation of the genetic physiological and molecular basis of useful traits and the improvement of the improved donors containing multiple traits are key activities for variety development high throughput genotyping systems assisted by bioinformatics and data science provide efficient and easy tools for geneticists and breeders recently new breeding techniques applied in some food crops have become game changers in the global food crop market with this background we invited 18 eminent researchers working on food crops from across the world to contribute their high quality original research manuscripts the research studies covered modern food crop genetics and breeding plant molecular systems focusing to food crops plant genetic diversity qtl and gene identification utilizing high throughput genotyping systems and their validation new breeding techniques in food crops targeted mutagenesis genome editing etc abiotic and biotic stresses qtl gene identification and their molecular physiology plant nutrition grain quality improvement and yield enhancement
