central to most sociologists self image is the claim that their theories are based on research however using a random sample of 680 articles appearing in major american british and canadian journals dr menzies shows that in some areas of sociology the wide gap between theory and research means that much of sociological theory is virtually untested he explains how theory is embodied in eight particular types of research critically examines these research theories and contrasts them with the positions of modern theorists the sample of journal articles also permits a comparison of british

american and canadian sociology by contrasting on how researchers use theories. Dr. Menzies is able to reassess several theories for instance symbolic interactionist research uses embedded causal claims and stands in a dialectical relationship to other sociological research while the research version of conflict theory depends on external causes to explain social change. It brings together three central approaches: Laclau and Mouffe's discourse theory, critical discourse analysis, and discursive psychology in order to establish a dialogue between different forms of discourse analysis often kept apart by disciplinary boundaries. The book introduces the three approaches in a clear and easily comprehensible manner, explaining the distinctive philosophical premises and theoretical perspectives of each approach as well as the methodological guidelines and tools they provide for empirical discourse analysis. The authors also demonstrate the possibilities for combining different discourse analytical
