ll learn how to automate policy deployment using python and pan os apis structure firewall configurations as code and integrate firewalls with it workflows and infrastructure as code tools by the end of the book you ll be able to design automate test and migrate firewall policies with confidence gaining practical experience in quality assurance techniques pilot testing debugging and phased cutovers all while maintaining security and minimizing business impact what you will learn master next generation firewall fundamentals design enterprise grade security policies for the internet gateway apply app id url filtering and threat prevention automate policy deployment using python pan os apis sdks and iac tools customize response pages with jinja2 and integrate them into service desk workflows test and validate with qa techniques and pilot testing migrate policies with confidence and zero downtime who this book is for this book is for firewall engineers security engineers consultants technical architects and cisos who want to enhance their network security expertise through policy as code on palo alto networks firewalls it s also perfect for those with working knowledge of python programming and hands on experience with palo alto networks next gen firewalls whether in business government or education this book will help network engineers security architects and devsecops professionals simplify firewall management and reduce operational overhead

the book deals with the urgent need for the eu to position itself globally in the wake of brexit a rapidly worsening climate crisis the covid 19 pandemic an aggressive russia and an ever more assertive china after 60 years of intensive navel gazing that focused on institutional design more than world politics the eu is now forced to defend its liberal democratic values which have come under attack from inside and outside the european integration project moreover realpolitik is back on the agenda europe s content negligence of defense matters in the past few decades has been revealed by russia s war of aggression against ukraine

this book constitutes revised and selected papers from the first international conference on society 5 0 society 5 0 2021 held virtually in june 2021 the 12 full papers and 3 short papers presented in this volume were thoroughly reviewed and selected from the 54 qualified submissions the papers discuss topics on application of the fourth industrial revolution innovations e g internet of things big data artificial intelligence and the sharing economy in healthcare mobility infrastructure politics government economy and industry

this book explores the geopolitics of the global cyber space to analyse india s cyber security landscape as conflicts go more online nation states are manipulating the cyber space to exploit each other s dependence on information communication and digital

technologies all the major powers have dedicated cyber units to breach computer networks harvest sensitive data and proprietary information and disrupt critical national infrastructure operations this volume reviews threats to indian computer networks analyses the country s policy responses to these threats and suggests comprehensive measures to build resilience in the system india constitutes the second largest internet user base in the world and this expansion of the user base also saw an accompanying rise in cyber crimes the book discusses how the country can protect this user base the data dependent critical infrastructure build resilient digital payment systems and answer the challenges of the dark net it also explores india s cyber diplomacy as an emerging economy with a large it industry and a well established technological base topical and lucid this book as part of the gateway house guide to india in the 2020s series will be of interest to scholars and researchers of cyber security digital diplomacy foreign policy international relations geopolitics strategic affairs defence studies south asian politics and international politics

despite much learning and research over many decades large ict software projects have continued to experience poor outcomes or fallen short of original expectations some spectacularly so this is the case in the australian and new zealand public sectors even though these projects operate within historically developed institutional frameworks that provide the rules guidelines and controls and aim to consistently improve outcomes something is amiss in adapting for inertia grant douglas questions the effectiveness of these institutional frameworks in governing large ict software projects in the australian and new zealand public sectors he also gauges the perspectives of a large number of actors in projects in both sectors and examines two case studies in detail the main narrative to emerge is that the institutional frameworks are in a state of inertia they are failing to adapt owing to various institutional factors all of which have public policy implications sadly douglas finds this inertia is likely to continue if there is difficulty in changing the capacity to govern he proposes policymakers should look to change the nature of what is to be governed

fresh clean and simple album moxie makes designing photo albums a breeze for a lot of photographers album design is synonymous with headache the hours and hours spent designing are usually followed by weeks or even months of revisions making for a painful experience for everyone involved but it doesn t have to be that way this book will show you how to combine the right tools with a simple strategy making it possible even easy to design basic albums in seconds and custom wedding or portrait albums in an hour or less by the time you finish the book you ll have a beautiful finished design that s ready to be ordered overhauling the entire approach
