this book explores the collective character of action to expand the ways we think about
agency first it resists viewing agency as a capacity much less one exclusive to humans
instead it defines agency as an umbrella term for the concrete sociomaterial processes that
emerge from the collaborative efforts of multiple entities acting together agency isn t the
faculty of an individual entity or self it s always the function of a network or assembly of
actors second many of the actors involved in these processes are nonhuman things without
intentions will or even awareness this relational and collective approach adopts a conception
of action that doesn t hinge on mental states to act is to participate in contribute to shape
facilitate organize constrain and modify the course of events this book argues that there s no
such thing as an individual action and that agency is collectively distributed across a
heterogeneous field of human and nonhuman actors provided by publisher
