What first captivated me was the sheer brilliance of Xieguiore's setting. It's more than just a backdrop; it's a living, breathing entity. The author has woven a tapestry of unique cultures, breathtaking landscapes, and intricate societal structures that feel utterly real, yet delightfully fantastical. You can practically taste the spiced air, feel the ancient stones beneath your feet, and hear the rustle of leaves in their enchanted forests. in late twentieth century england inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power neither interpretation is satisfactory class remained important to ordinary people s narratives about social change and their own identities throughout the period 1968 2000 but in changing ways using self narratives drawn from a wide range of sources the raw materials of sociological studies transcripts from oral history projects mass observation and autobiography the book examines class identities and narratives of social change between 1968 and 2000 showing that by the end of the period class was often seen as an historical identity related to background and heritage and

that many felt strict class boundaries had blurred quite profoundly since 1945 class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity individuality and ordinariness in fact sutcliffe braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people s attitudes towards class and towards politics the study also examines the claim that thatcher and new labour wrote class out of politics arguing that this simple and highly political narrative misses important points thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the new labour project was good at listening to voters particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness but this did not add up to an abandonment of a majoritarian project as new labour reoriented their political project to emphasize using the state to empower the individual

in british politics and the policy process originally published in 1987 grant jordan and jeremy richardson provide an introduction to the workings of british political process and a guide to the ways in which it can be studied they show how political decisions are taken and policies are adopted inside parliament in the political parties and in cabinet and how they are mediated and influenced by for example the civil service and pressure groups in doing so they draw widely on case study material and systematically utilize the memoir material of ex ministers and civil servants to give a realistic feel for policy making at the centre of british politics this book is however interpretative as well as descriptive the authors argue that parliament is usually marginal to political decision making and powerfully reject the thesis of adversary politics which holds that british politics undergoes major change when there is a switch in party control of government this then is a textbook that will serve as an ideal introduction to students of british government and comparative politics but which is also a stimulating and original contribution to current debates in political science

first published in 1990 john maynard keynes once made the bold prediction that the three hour work day would prevail for his grandchildren s generation seventy years later the question of working time is as pertinent as it was at the inception of the 40 hour week not until now however has there been a global comparative analysis of working time laws policies and actual working hours

despite a century long optimism about reduced working hours and some progress in legal measures limiting working hours this book demonstrates that differences in actual working hours between industrialized and developing countries remain considerable without any clear sign of hours being reduced this study aims to offer some suggestions about how this gap can begin to be closed most basic questions facing planning theory and practice today the author argues that it is not plans that determine the shape of cities but political processes in the 1980s state planning came under siege planners had to justify their existence to politicians the business world and the public though planning must still be accountable neither the complete domination of the market nor traditional post war planning ideologies are wholly acceptable in the 1990s a new agenda and a major rethinking of planning from first principles is required but what form should this take showing that political theory provides the proper foundation for understanding planning practice the book explores in turn assenting and dissenting planning paradigms exploration of the former begins with weber and moves through pluralism corporatism and neo liberalism dissenting theory is organized around the work of marx orthodox neo marxism gramsci s philosophy of praxis the critical theory of the frankfurt school and the work of habermas the author concludes with a presentation of an integrated political perspective upon planning and the state
