the health and fitness industry has lied to me for many years it is currently worth 4 2 trillion the healthy eating nutrition and weight loss sector alone is worth 702 billion there are many brilliant ideas to make big bucks from people who are looking for fat burn secrets or how to burn belly fat fast and most of them are based on magical rapid weight loss diet plans powders teas exercise plans pills etc the industry is making giant money off of ordinary people who want to learn more but there is so much

information thrown at them that they just can't distinguish legit data from the crap that was creatively made to look like evidence based material are you a serial dieter who has tried literally everything that's out there are you a mature woman who has been told that weight loss for women over 40 is just not happening are you unsuccessfully trying to lose that post pregnancy weight are you feeling bitter and disappointed because you are so dedicated to your workout routines and healthy eating learned how to count calories but somehow you still can't seem to get rid of those last few pounds or are you a little scared and reluctant to start any weight loss program because they all just seem to be so strict that they would require your undivided attention and efforts you do not need to be always hungry and miserable to lose weight your life does not have to be full of restrictions and exclusions your family life does not have to be ruined social situations do not have to be unbearable you don't have to kiss pizza goodbye forever you don't have to kill yourself training you can eat as many meals per day as you want at whatever time you choose you don't have to spend hundreds of dollars on supplements does this sound like science fiction it's not it's just science no magic do yourself a favor stop reading obsolete and harmful weight loss theories stop listening to charlatans telling you that a detox or magic pills will solve your problem stop getting excited about new strict weight loss diets which promise you 40 lbs less in 2 months learn what weight loss is really about how it actually happens and how you can pull this off and still live a normal life this book will not tell you what exactly you must not eat however it will show you how to choose what you eat what flexible dieting looks like and how your body will respond to what's on your plate this book focuses on the most important things you need to know including hormone balance information in this book is based on pure scientific knowledge and its sensible interpretation and not on guesswork or some tortuous ideologies that simply feel right at the time for their authors so they present them as scientific facts the weight loss process is simple logical and easy this is the only book on weight loss that you will ever need because nothing else actually works does this mean it will require no effort at all of course not you have to work to get what you want after all if we keep doing what we're doing we're going to keep getting what we're getting stephen covey will this turn your life upside down no not in a negative sense you can lose weight while having a normal life however it will definitely be a life changing experience this i can promise

written with non majors in mind discovering nutrition sixth edition introduces students to the fundamentals of nutrition with an engaging and personalized approach the text focuses on teaching behavior change and personal decision making with an emphasis on

how our nutritional behaviors influence lifelong personal health and wellness while also presenting up to date scientific concepts in a number of innovative ways students will learn practical consumer based nutrition information using the features highlighted throughout the text including for your information boxes presenting controversial topics quick bites offering fun facts and the new feature why is this important opens each section and identifies the importance of each subject to the field

clinical exercise physiology fourth edition with resource is the most comprehensive guide to the clinical aspects of exercise physiology covering 24 chronic conditions it is the go to book for students preparing for acsm clinical exercise physiologist certification

in his book reversing chronic lyme disease craig bruner has written perhaps one of the most in depth intelligent and comprehensive books ever written on the subject of chronic lyme disease extremely powerful yet practical it addresses nearly every important level of the lyme narrative a no holds barred and honest look at how the government and conventional medicine have not only failed the lyme victim but by using their drug based model have actually prolonged the disease in the vast majority of chronic sufferers the author lays out a new paradigm that he used himself to reverse and completely heal his long entrenched chronic lyme disease almost exclusively without the use of drugs this book puts the power of healing squarely back in the hands of the lyme victim and provides an intelligent road map that can be custom designed to help reverse lyme disease even in the most resistant of sufferers this is a monumental work and represents the culmination of over 6 years of research seldom has the subject of lyme disease been studied written about and presented on such a level it will open your eyes with an in depth look at not just lyme disease but the chronic form which other authors seldom even discuss let alone present why it happens additionally craig bruner shares therapies based upon the findings of research primarily targeted towards reversing chronic lyme disease many of which have never been presented in any other book certainly most doctors are not even aware of this information this book may make most others obsolete get ready to be overwhelmed by the thorough manner in which the topic of chronic lyme disease has been explored and many of the newer strategies that can be employed which have brought healing beyond expectation be warned this is powerful information that can offer the sufferer new hope that he she can experience a deeper level of healing
