the textbook of medical psychiatry was written for the wide range of clinicians who grapple with the diagnostic and treatment challenges inherent in this clinical reality medical and psychiatric illnesses do not occur in isolation from one another because assessment in these cases may be challenging the book addresses general medical conditions that directly cause psychiatric illness and the medical differential diagnosis of common psychiatric illnesses in addition the book describes how the presentation and treatment of both psychiatric and medical disorders are modified by the presence of comorbid conditions the editors who are at the forefront of the field have assembled an outstanding group of contributors all of whom share the objective of helping psychiatrists internists neurologists trainees and other health care providers recognize the medical issues facing patients with psychiatric symptoms and vice versa proper assessment and treatment are dependent on the skillful application of this knowledge written in down to earth clinically grounded prose this text provides a comprehensive exploration of approaches to the patient including perspectives from internists and neurologists on dealing with diagnostic uncertainty and special chapters on the neurological examination cognitive testing neuroimaging laboratory testing and toxicological syndromes presents a

review of medical disorders that can directly or indirectly affect the clinical presentation and course of psychiatric disorders presents a review of psychiatric disorders that can be caused by medical illnesses or affect the clinical presentation and course of medical disorders includes chapters on pain insomnia and somatoform disorders conditions that accompany many psychiatric and medical illnesses and that fall in the boundary between these practice settings in clinics and offices every day physicians encounter patients whose presentations are atypical or whose symptoms are not responsive to usual care when facing the challenges of accurately assessing complicated symptoms and managing the care of complex patients clinicians often seek advice from colleagues whose perspectives and expertise they trust the chapters in the textbook of medical psychiatry can be consulted in much the same fashion expanding clinicians knowledge base and helping them to more effectively diagnose and care for their patients

when my colleagues and i began the task of assembling this volume several difficult questions arose for whom were we writing was the purpose to elucidate psychiatric or medical presentation should references reflect specific topical areas or lead the reader to a more general view of a particular topic would a symptom or system approach best serve the reader should the volume cover a few areas in detail or attempt to survey a larger area of knowledge the present text reflects an attempt to answer these questions it is designed for the student of medicine who desires a broader understanding of those medical illnesses that produce psychiatric aberration we hope it will be of assistance to the medical student or house officer studying medicine neurology family practice pediatrics or psychiatry as well as to the practicing clinician who wishes a refresher on this subject or a reference for his library the text is intended to strike a useful balance between medicine and psychiatry by providing a list of differentials for specific symptoms or conditions as well as suggestions for medical evaluation references have been chosen which we hope will assist the reader in further study we have attempted to diversify them and list a spectrum of articles that deal with both academic and practical treatment considerations the initial volume is divided into four sections that address both a symptom and system approach

children may require high dependency care for a variety of reasons and this care is delivered ideally in a designated high dependency unit but sometimes on the general paediatric ward or even an adult ward as a temporary measure children's high dependency nursing is an invaluable resource for nurses delivering high dependency care to children providing them with the knowledge required to deliver effective and high quality high dependency care children's high dependency nursing explores all the key areas required for efficient nursing care including what high dependency care is and how and where it should be delivered clinical examination skills and the various clinical or body systems requiring support caring for families when a child dies and mental health and intellectual impairment with practical
