literatures cultures translation presents a new line of books that engage central issues in translation studies such as history politics and gender in and of literary translation this is a culturally situated study of the interface between three forms of transtextual rewriting translation adaptation and imitation two questions are raised first how a broader rubric can be formulated for the inclusion of the latter two forms within translation studies research and second how this enlarged definition of translation enables us to understand the incompatibilities between contemporary western theories of translation and east asian realities past and present recent decades have seen a surge of scholarly interest in adaptations and imitations due to the flourishing of cinema and fandom studies and to the impact of a poststructuralist turn that sheds new light on derivative literature against this backdrop a plethora of examples from the east asian cultural sphere are analyzed to show how rewriters have freely appropriated transcreated and recontextualized their source texts in particular sino japanese case studies are contrasted with sino english ones with both groups read against evolving traditions of thinking about free forms of translation east and west

this book is the first major study of the making of transnational food safety law in china

francis snyder shows how the 2008 melamine infant formula crisis led to china's first food safety law and new food safety standards substantial reforms in government policy and closer relations with international organisations he also identifies current and future challenges and makes recommendations for dealing with them chinese food safety law today is influenced strongly by cross border factors while transnational regimes help to shape domestic decisions many institutions deeply embedded in chinese society have played key roles in this transformation francis snyder emphasises that in finding its own path toward ensuring food safety china can both learn from and teach other countries in may 2017 this title has been awarded a gourmand world cookbook award in yantai shandong province china best in the world in two categories best wine law book and food safety institutions

japan was the first asian nation to face the full impact of modernity like the rest of japanese society buddhist institutions individuals and thought were drawn into the dynamics of confronting the modern age japanese buddhism had to face multiple challenges but it also contributed to modern japanese society in numerous ways buddhism and modernity sources from nineteenth century japan makes accessible the voices of japanese buddhists during the early phase of high modernity the volume offers original translations of key texts many available for the first time in english by central actors in japan's transition to the modern era including the works of inoue enryō gesshō hara tanzan shimaji mokurai kiyozawa manshi murakami senshō tanaka chigaku and shaku sōen all of these writers are well recognized by buddhist studies scholars and japanese historians but have drawn little attention elsewhere this stands in marked contrast to the reception of japanese buddhism since d t suzuki the towering figure of japanese zen in the first half of the twentieth century the present book fills the chronological gap between the premodern era and the twentieth century by focusing on the crucial transition period of the nineteenth century issues central to the interaction of japanese buddhism with modernity inform the five major parts of the work sectarian reform the nation science and philosophy social reform and japan and asia throughout the chapters the globally entangled dimension both in relation to the west especially the direct and indirect impact of christianity and to buddhist asia is of great importance the introduction emphasizes not only how japanese buddhism was part of a broader globally shared reaction of religions to the specific challenges of modernity but also goes into great detail in laying out the specifics of the japanese case

this book examines china's trade insertion strategy in latin america divided into five parts

the book features scholars from china chile costa rica peru and mexico who present the main actors and dynamics around china's trade policy in the region in twelve carefully selected contributions with qualitative and quantitative case studies highlighting china's important trade presence in latin america after joining the world trade organization. The book analyzes the effects of free trade agreements china signed with three countries in the region: chile 2005, peru 2010 and costa rica 2011, as well as specific preferential agreements with other countries from latin america. While the first part of this book reviews china and latin america trade policies, the second part explores china's view of latin america. In a third part of the book, the contributions provide a deeper look into the trade relations between china and the countries of peru, costa rica, mexico and the united states. The fourth part of the volume focuses on the emerging trade agenda between the two regions. Finally, the fifth part of the book discusses the trade challenges between china and latin american and caribbean countries. The book will appeal to scholars of international relations, economics and political science, as well as policy makers interested in a chinese and latin american perspective on trade policy in general and on china's trade policy in the region in particular.

In vivo magnetic resonance imaging (MRI) has evolved into a versatile and critical if not gold standard imaging tool with applications ranging from the physical sciences to the clinical. In addition, there is a vast amount of accumulated but unpublished inside knowledge on what is needed to perform a safe *in vivo* MRI. The goal of this comprehensive text, written by an outstanding group of world experts, is to present information about the effect of the MRI environment on the human body and tools and methods to quantify such effects by presenting such information all in one place. The expectation is that this book will help everyone interested in the safety and biological effects in MRI find relevant information relatively quickly and know where we stand as a community. The information is expected to improve patient safety in the MR scanners of today and facilitate developing faster, more powerful yet safer MR scanners of tomorrow. This book is arranged in three sections: the first, named static and gradient fields (chapters 1-9), presents the effects of static magnetic field and the gradients of magnetic field in time and space on the human body; the second, named radiofrequency fields (chapters 10-30), presents ways to quantify radiofrequency (RF) field-induced heating in patients undergoing MRI, the effect of the three fields of MRI environment, i.e. static magnetic field, time-varying gradient magnetic field, and RF field, on medical devices that may be carried into the environment with patients; is also included. Finally, the third section, named engineering (chapters 31-35), presents the basic background engineering information regarding the equipment, i.e. superconducting magnets, gradient coils, and RF coils that produce the static magnetic field, time-varying gradient magnetic field, and RF field. The book is intended for undergraduate and postgraduate students, engineers, physicists, biologists, clinicians, MR technologists, other healthcare professionals, and everyone else who might be interested in looking into the role of MRI environment on patient safety, as well as those just wishing to update their knowledge of the state of MRI safety. Those who are learning about MRI or training in magnetic resonance in medicine will find the book a useful compendium of the current state of the art of the field.

winner of the walter e masing book prize 2019 at the international academy for quality perceptions as to the nature of the quality sciences and disciplines vary across the world depending on local industrial history this can cause problems for global organisations who often want to retain the quality policies of the parent company whilst attempting to embrace the approaches familiar to local people for example whilst western organisations have embraced six sigma lean and other japanese management techniques we have tended to adopt them in a hotchpotch fashion bolting them on without ever understanding the context behind total quality control in japan these concepts are not considered to be standalone but are all part of a seamless companywide matrix of interactive concepts which can be summed up as company wide quality work of by and for all in essence this means that quality is everybody s responsibility from the chief executive downwards david hutchins has over several decades worked in all of the cultural blocks and has consistently managed to integrate all of these differences into a single companywide approach when the concepts covered are integrated into a total company wide programme the intention is to make that organisation the best in its business in japanese terms this implies dantotsu which means number one thinking accessible and practical in approach quality beyond borders is split into short sections each representing a self contained idea for the reader to digest and reflect on it is a valuable resource for business practitioners students and academics alike that will enable you to reach beyond your own borders to implement new ideas with significant results

redefining eu membership examines the issue of membership within the european union eu today by focusing on differentiation in and outside the eu the treaty on european union unequivocally declares that the contracting parties are the member states of the eu however a closer examination casts some doubt of the unitary status of member states or at least suggests that the concept requires nuancing whilst diversity and to some extent differentiation have been part and parcel of the european integration process since its inception redefining eu membership proposes that considering several developments a new reflection on membership within the eu and on differentiation in and outside the eu is required the volume s contributions are organized around four aspects of the tensions faced by the concept of a unitary and formal eu membership first an examination of key

policy areas which have already witnessed various forms of differentiated integration second an analysis of special statuses within the eu third important examples of non member states in which eu law is applied with and without their participation in the eu s decision making process and fourth the situation of states under accession or secession procedures which obliges them to accept eu norms and policies even prior to after formal membership these analyses are complemented by a reflection on the concept of membership in itself in a context in which eu enlargement appears likely the provided analysis reflects on the need to expand and introduce several kinds of membership to the eu in the future

the japanese concept of *akogare* has become well known in tesol related literature in recent years usually in the context of interracial sexual desire in this far reaching new study of the internationalization of japanese higher education chisato nonaka uses *akogare* as both an analytical lens and the object of enquiry and ultimately reconceptualises it as the creation of a space where individuals negotiate and transcend their ethnic national racial gender or linguistic identities the book innovatively engages with the often controversial binary of japanese non japanese and demonstrates how japan often thought of as a homogenous nation may be at a critical crossroads where long held assumptions about a singular japanese identity no longer hold true the book has profound implications for how internationalization can mean more than just the use of english
