this groundbreaking volume brings together major figures in disability studies in education and critical race theory to explore some of today's most important issues in education. Scholars examine the achievement opportunity gaps from both historical and contemporary perspectives as well as the overrepresentation of minority students in special education and the school-to-prison pipeline. Chapters also address school reform and the impact on students based on race, class, and disability and the capacity of law and policy to include and exclude. Readers will discover how some students are included and excluded within schools and society, why some citizens are afforded expanded or limited opportunities in life, and who moves up in the world and who is trapped at the bottom of the well. Contributors: L. Adams, Susan Baglieri, Stephen J. Ball, Alicia Broderick, Kathleen M. Collins, Nirmala Erevelles, Edward Fergus, Zanita E. Fenton, David Gillborn, Kris Guitierrez, Kathleen A. King, Thorius, Elizabeth Kozleski, Zeus Leonardo, Claudina Mahon, Reynolds, Elizabeth Mendoza, Christina Paguyo, Laurence Parker, Nicola Rollock, Paolo Tan, Sally Tomlinson, and Carol Vincent. With a stunning set of authors, this book provokes outrage and possibility at the rich intersection of critical race, class, and disability studies, refracting back on educational policy and practices, inequities and exclusions, but marking also spaces for solidarities. This volume is a must-read for preservice and long-term educators as the fault lines of race, disability, and class meet in the belly of educational reform movements and educational justice struggles. Michelle Fine, distinguished professor of critical psychology and urban education, The Graduate Center, CUNY, offers those who sincerely seek to better understand the complexity of the intersection of race, ethnicity, disability, social class, and gender a stimulating read that sheds new light on the root of some of our long-standing societal and educational inequities. Wanda J. Blanchett, distinguished professor and dean, Rutgers University Graduate School of Education.

Today's concerns about the financial stability of social security, trends in disability health care costs, and the supply of caregivers are all driven by the coming explosion in the number of people over the age of 65. Aging in America focuses on the economic and demographic portrait of the senior population and can provide a context for analysis of broader population issues. It provides a wide range of characteristics of the older population, including age composition, race, and Hispanic origin, educational attainment, living arrangements, veteran status, employment, and income, health insurance, disability, and housing characteristics. Extracting comparative information from the census bureau's databases can be difficult and time-consuming. Aging in America provides comparative data on a variety of topics in a single, easy-to-use volume. Some of the benefits of Aging in America include: it provides a cross-section of socioeconomic characteristics focused on the aging population for commonly researched geographic areas (states, counties, cities, metropolitan and micropolitan areas, and congressional districts); the tables are structured to allow easy comparisons across geographic areas; and easy profiling of characteristics.
