trb s national cooperative highway research program nchrp report 703 guide for pavement type selection includes processes for conducting systematic evaluations of pavement alternatives and for making decisions on pavement type selection the processes may be used for both agency based and contractor based type selections and may be applied to different pavement types and structures

historically regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them as well as their potential to cause cancer and other adverse health effects as scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health as well as their effects on other species and ecosystems identification of high priority chemicals and other chemicals of concern has prompted a growing number of state and local governments as well as major companies to take steps beyond existing hazardous chemical federal legislation interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned the overarching goal of these approaches is to avoid regrettable substitutions which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence bioaccumulation toxicity or other concerns chemical alternative assessments are tools designed to facilitate consideration of these factors to assist stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health and to provide guidance on how the industry may develop and adopt safer alternatives a framework to guide selection of chemical alternatives develops and demonstrates a decision framework for evaluating potentially safer substitute chemicals as primarily determined by human health and ecological risks this new framework is informed by previous efforts by regulatory agencies academic institutions and others to develop alternative assessment frameworks that could be operationalized in addition to hazard assessments the framework incorporates steps for life cycle thinking which considers possible impacts of a chemical at all stages including production use and disposal as well as steps for performance and economic assessments the report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process this new framework allows the evaluation of the full range of benefits and shortcomings of substitutes and examination of tradeoffs between these risks and factors such as product functionality product efficacy process safety and resource use through case studies this report demonstrates how different users in contrasting decision contexts with diverse priorities can apply the framework this report will be an essential resource to the chemical industry environmentalists ecologists and state and local governments

the recruitment process is costly lengthy and complex offering ample opportunity for making a bad decision as well as a good one manager s guide to recruitment and selection shows that successful recruitment is a two way process involving both employer and employee

the old cliché states that not every manager is a leader but the more important part of that sentiment is that to be a good manager one has to be a good leader this perception is because good managers do more than manage they have to lead by inspiration they have to lead by example and they have to lead through the best times for their organizations as well as the absolute worst times a systematic guide to leadership selection using total quality management techniques identifies the application gap and presents a methodology based on total quality management tqm to support the guidance of a process to select leadership at any level of the organization a modification to the house of quality and a product of the massachusetts institute of technology is presented and discussed as the core of a leader selection process two case studies are used to reinforce the concepts and applications finally the book introduces some experiments for leadership development using virtual worlds and ends with a note for the future using the metaverse and digital twins for leadership the book is intended for professionals and executives wanting to learn more about leader selection engineering and business students directors of human resources and researchers in the field of leadership

the expanded seventh edition complete with new materials and updated information on existing materials for chemical protective clothing the revised and updated seventh edition of quick selection guide to chemical protective clothing contains the most recent information on the selection use and care of chemical protective clothing such as protective gloves suits and other garments the seventh edition includes new selection recommendations new materials and chemicals tested and updated information on existing products this accessible guide also contains the popular color coded selection grid the grid system indicates which materials offer protection against specific chemicals and which do not selecting the most appropriate chemical protective clothing is essential for the prevention of illnesses and injuries from hazardous chemical exposure especially where other control measures are not feasible written by noted experts on the topic the book has been thoroughly revised to reflect the most recent advances in the field the new seventh edition offers an updated trade name table with 25 product name changes 8 new products and 10 products deletions includes 27 products in the master chemical resistance table with changed names and includes replaces outdated products with important new ones contains new selection recommendations color codes that reflect new chemicals and additional tests includes 1 000 chemicals in the index that are linked to the un pictograms and risk codes related to skin exposure provides a guide for comparing the performance of available product barrier materials currently on the market written for anyone responsible for the purchase or use of protective clothing the updated seventh edition of quick selection guide to chemical protective clothing is a pocket guide that is the only independent source for selection of chemical protective clothing

the selection of air pollution control apparatus can be a daunting task even for experienced pollution control professionals the air pollution control equipment selection guide eases the burden by providing extensive information on the best equipment available for any air pollution control problem instead of endorsing one technology over another the author provides general information so that you can decide on the proper technology to use for any given application the book offers ample introductory information including a helpful air pollution 101 chapter that reviews the basics of air pollution control the text is divided into sections that are organized by the primary technology employed i e quenching cooling particulate removal gas absorption etc this structure enables you to jump from section to section and quickly compare technologies each section defines the type of gas cleaning device the basic physical forces used in it its common sizes and its most common uses many air pollution control problems are

not solved with one type of device but through using a variety of designs synergistically to make this task easier the author includes sections on each of these devices and notes where they are commonly used in concert with other equipment wherever possible the text includes current photographs or drawings of typical equipment within that device type written in an easy to read style air pollution control equipment selection guide serves as a technologically accurate reference that will facilitate the selection of air pollution control equipment for any operation

performed in the cardiac catheterization laboratory is also included in this section the next section deals with all aspects of cardiac surgery surgery for ischemic heart disease valve surgery aortic surgery robotically assisted cardiac surgery surgery for congenital heart disease and cardiac transplantation are covered by well known experts the last section points to expected refinements and future developments in cardiology such as stem cell therapy newer thrombolytics new frontiers in balloon valvotomy and cardiac transplantation and artificial hearts this book includes more than 300 full coloured images and illustration it can be used as a reference book in every library hospitals medical colleges and research institutions
