no philosophical idea no matter how small can live alone ideas always gain their force power and life from their surroundings their ecosystem the ecosystem of ideas defended in this book comes from the ancient greek philosopher aristotle and his medieval interpreter thomas aquinas the ongoing relevance of their philosophical thought to twenty first century issues is opened up in fascinating ways in this book life the universe and everything is the product of thirty years of teaching introductory courses in philosophy assuming no prior background it only requires of readers an enquiring mind and a willingness to think carefully an ideal guide to the big questions we face

every family has a story but very few have a story like joseph sadusky and his sons daveon and mark in magic lessons joe shares a look back as he a single gay man decided to build his family through transracial adoption in a lighthearted collection of stories and lessons learned joe humorously but honestly describes the process as he set out to adopt two older children and what happened after they came together under one roof and became us along the way joe details how often he was in his own words amazed aggravated mind blown jaw dropped befuddled exasperated and awed both in good ways and bad both by my kids and by the many players who have had a part in our family story overall among these players are members of the majority racial cultural and otherwise who taught joe many bewildering if not outright painful lessons about being other to complete the picture joe reflects on his own mistakes made as he has ventured through the land of alt parenthood

the poems in this book were written over a period of 21 years between 1974 and 1995 they were written when i was focused on venturing into life as an adult and continuing forward into the birth of my four children my family writing and poetry proved to be a valuable lifeline when i believed i would be alone and needed to forge my path in life if i were to succeed poetry can provide therapeutic relief from worries and life s excess stress it invites readers to incorporate their thoughts and emotions into the words creating the opportunity for temporary breaks from everyday life encounters though the poems i learned that it was okay to be upset smile laugh cry and to simply live we can intertwine and cross what s real with what s fantasy if only just for that moment in time

what is life all about is life a grand conspiracy a marvelous mystery an incredible accident or something else the surprise is that you can know the truth about life and be 100 confident in that knowledge you will know what is on the other side of death amazingly your success or failure in life has to do with your attitude the person with the wrong attitude can read see hear the truth and deny it vehemently while the person with right attitude will understand appreciate and believe the truth life is a perfect and difficult test the process of life itself sorts out good from evil right from wrong and you will succeed or fail depending on your attitude the book defines the attitude you need to succeed and provides evidence and examples to convince what is life really all about it may be true that most people do not care but what is the reason for not caring generally it is because people doubt anyone really knows and thus why should anyone care in addition the world brings great confusion to this subject there are scams and frauds around every corner and even honest people push the limits of the truth with exaggeration which is really a lie greed selfishness covetousness envy and power are behind a lot of the deceit the wonder of heaven will provide infinitely more than people could ever achieve on earth but people want everything now and deceit is a frequent companion to achieving earthly desires there are 45 chapters in the book what is life all about and then some extensive helpful appendices another 163 pages the single most influential deceit is in the area of religion the single most prominent reason for being an atheist or agnostic is religion the past 2000 years of religious history includes unspeakable cruelty wars terrorism indoctrination lies and deception and this rightly leads to opposition but also strangely to acceptance indifference excuses by others the critical missing fact is that god had nothing to do with these religions but abhors them what a pathetic assumption to blame god the truth about god and these religious groups could quickly clarify the situation chapter 16 is a chapter that begins to sort out how all this religious mess occurred here is a partial outline for chapter 16 16 1 what is seriously wrong with judaism 16 2 what is seriously wrong with roman catholicism 16 3 what is seriously wrong with protestant groups 16 4 what is seriously wrong with islam 16 5 what is seriously wrong with mormonism 16 6 what is seriously wrong with the jehovahs witnesses 16 7 what is seriously wrong with atheism agnosticism seriously wrong means there is no eternal value in these religions these belief systems were the fabrication of men and or women and did not come from god the evidence is overwhelming and deceit runs through these religions like vultures going through a carcass you do not need a forensic analysis but you can do a complete autopsy if you wish the damaging evidence regarding these groups is clearly seen and very logical and understandable from the book this is because as you understand god a significant subject in the book you do not need to go very far into these beliefs to see huge problems one of the attitudes you need is a love of the truth more than the love of what you currently believe you can understand god his purpose his plan inasmuch as he has revealed himself incredibly one major obstacle to overcome will be the magnitude of the deceit lies on top of lies often for many centuries define today's religions religion has become man's idea of god and there is no consistency just random unrelated doctrines the truth is infinitely different with everything perfectly connected to a single purpose ultimately your success or failure in life is simply a matter of where you place your trust is your trust in god or is it in men women who say they are telling you

humans pose an unprecedented threat to life in all its great diversity of forms the human induced extinction rate has been compared to mass extinctions of the past but this language masks the fact that the crisis is due to voluntary and thus avoidable choices and actions speaking of forms of life shows that at the root of this crisis is the tragic inadequacy of the language predominantly used to represent and address what we are doing including the language of sustainable development rights for animals and the rest of nature their intrinsic value and conservation of species as populations this talk alienates us from the other living things from what they actually are have and do and it perpetuates the harm and loss campagna and guevara compellingly argue on rigorous but accessible grounds that there is an alternative language to guide conservation in confronting the radically urgent ethical issues it faces this is a language with which we are all familiar mastered by naturalists from aristotle to audubon it articulates the primary value in life and the standard that must guide how human beings should live as one form of life among countless others this book is a homecoming for those who practice conservation to above all else secure a creature s ability to satisfy the necessities of its form of life this is an essential book for anyone who cares about conservation and is concerned about the frightening pace of extinctions the great theme of the book is the importance of the language in which we think and talk about living beings daniel guevara and claudio campagna make available for conservationists the ground breaking work of philippa foot and michael thompson on natural goodness and on our thought about living beings they show how it can be brought to bear on the threats that confront conservation and on disputes that may seem irresolvable i recommend speaking of forms of life as strongly as i can cora diamond william r kenan jr professor emerita of philosophy professor of law and university professor university of

virginia our current conservation language is shot through with economic platitudes that don't explain anyone's real motives for conserving biodiversity. campana and guevara's new book lays out a convincing alternative grounding conservation goals in the objective goodness of life's many ways of flourishing. speaking of forms of life is inspiring, informative, well grounded in the relevant philosophy and conservation literatures, but never pedantic. both activists and thinkers will find much of value in speaking of forms of life. philip cafareo, professor of philosophy, colorado state university, speaking of forms of life helps us confront the fact that language often obscures rather than facilitates our understanding of living things. our language reflects past misperceptions, current ignorance, and our shockingly limited intellectual ability to comprehend where we are in space and time and who we are with on this strange planet with its soap bubble coating of life. the language in use has abetted and accelerated the catastrophic course we daily continue to choose. speaking of forms of life shows us why and how this must change. it's a crucial revelation that we must heed because our species alone can consider changing course and our species alone must do so. carl safina, macarthur fellow, carl safina research chair for nature and humanity, stony brook university, our biosphere is a miracle. communicating the sense of awe and wonder that it instills in many of us is essential to shift from wanton destruction of our natural world for short-term economic profit to health and prosperity for all creatures, including us humans. speaking of forms of life is the first book that unveils how the way we speak to each other affects the way we value and care for our planet. an essential read for everyone who cares about the future of nature and humanity. enric sala, national geographic explorer in residence and hubbard medalist.
