this is the first book length study of the classicism of tony harrison one of the most important contemporary poets in england and the world it argues that his unique and politically radical classicism is inextricable from his core notion that poetry should be a public property in which communal problems are shared and crystallised and that the poet has a responsibility to speak in a public voice about collective and political concerns enriched by edith hall s longstanding friendship with harrison and involvement with his most recent drama inspired by euripides iphigenia in tauris it also asserts that his greatest innovations in both form and style have been direct results of his intense engagements with individual works of ancient literature and his belief that the ancient greek poetic imagination was inherently radical tony harrison s large body of work for which he has won several major and international prizes and which features on the uk national curriculum ranges widely across long and short poems plays translations and film poems having studied classics at grammar school and university and having translated ancient poets from aeschylus to martial and palladas harrison has been immersed in the myths history literary forms and authorial voices of mediterranean antiquity for his entire working life and his classical interests are reflected in every poetic genre he has essayed from epigrams and sonnets to original stage plays translations of greek drama and racine to his experimental and harrowing film poems where he has pioneered the welding of tightly cut video materials to tightly phrased verse forms this volume explores the full breadth of his oeuvre offering an insightful new perspective on a writer who has played an important part in shaping our contemporary literary landscape

the rather specialized field of solar and infrared radiation measurements has become increasingly important due to the increased demands by the renewable energy and climate change research communities for data with higher accuracy and increased temporal and spatial resolutions recent advances in radiometry measurement systems and information dissemination also have increased the need for refreshing the literature available for this topic this book provides the reader with an up to date review of the important aspects of solar and infrared radiation measurements radiometer design equipment installation operation maintenance and calibration data quality assessment parameters and the knowledge necessary to properly interpret and apply the measured data to a variety of topics each of the authors has more than 40 years of experience with this subject primarily as the result of developing and operating multiple measurement stations working with the industry to improve radiometry and conducting various research projects the book s scope and subject matter have been designed to help a wide audience gain a general understanding of this subject and to serve as a technical reference a student new to the field will benefit from the review of terminology and the historical perspective for radiometry before addressing more detailed topics in radiometry that we hope will be of interest to the more experienced reader describes the strengths and weaknesses of irradiance instruments provides detailed information on how to assess uncertainty in measurements offers comprehensive background information needed to understand the use of solar instrumentation discusses design concepts for shadowband radiometers sky imagers and satellite based estimates of solar irradiance at the earth s surface includes chapter end questions references and useful links

this volume presents the second half of the proceedings of the sixth international conference of the international plutarch society 2002 the selected papers are divided by theme in sections concentrating on statesmen and statesmanship in plutarch s greek and roman lives the volume bears witness to the ongoing wide ranging interest in plutarch s biographies
