the phenomenon of age related cognitive decline has long been controversial both in terms of mere existence and with respect to how it is explained some researchers have dismissed it as an artifact of declining health or lower levels of education and others have attributed it to general changes occurring in the external environment still other interpretations have been based on the use it or lose it principle known as the disuse hypothesis or on the idea that there are qualitative differences in either the structure or the process of cognition across the adult years perhaps the most popular approach at present relies on the information processing perspective and attempts to identify the critical processing component most responsible for age related differences in cognition the primary purposes of this book are first to review the evidence of age related differences in cognitive functioning and then to evaluate the major explanations proposed to account for the negative relations between age and cognition that have been established included is a discussion of theoretical dimensions and levels of scientific theorizing assumed to be helpful in understanding and evaluating alternative perspectives on cognitive aging the various perspectives are then covered in detail and analyzed the text concludes with observations about the progress that has been made in explaining cognitive aging phenomena plus recommendations for research practices that might contribute to greater progress in the future

newspapers seem to be telling us that every cornfield is threatened by a dairy queen this media barrage about the crisis of our shrinking farmland can be traced to the 1979 publication of where have all the farmlands gone by the national agricultural lands study the nals report to which eleven federal agencies contributed argued that land use planning and control must be employed to protect valuable farmland from urban sprawl this volume a collection of essays by a distinguished group of

economists including theodore w schultz julian l simon and pierre crosson takes issue with the belief that croplands need governmental protection in opposition the collection as a whole supports two theses 1 shrinking farm acreage is not a serious problem and 2 individual choices by landowners in a market setting result in better organized land use than would governmental land use planning and regulation published for the political economy research center bozeman montana

this book focuses on two fundamental aspects of brain language relations one concerns the neural organization of language in the healthy brain the other challenges current approaches to treatment of aphasia and offers a new theory for recovery from aphasia the essence of the book lies in the phrase neural multifunctionality the constant and dynamic incorporation of non linguistic functions into language models of the intact brain the book makes the claim that language is a construction created as we use it and cannot be understood as being supported by neurally based linguistic networks only rather language emerges from the constant and dynamic interaction among neural networks subserving cognitive affective and praxic functions with neural networks subserving lexical retrieval naming sentence processing comprehension and discourse communication conversation in persons with stroke induced aphasia neural networks for executive system function attention memory motor system function visual system function and emotion interact with neural networks for language to produce the aphasia profile and to influence recovery from aphasia consequently neural multifunctionality in aphasia explains individual differences in the lesion deficit model and continued recovery over time redefining the concept of recovery from aphasia and offering new opportunities for treatment
