does the general public need to understand science and if so is it scientists responsibility to communicate critics have argued
that despite the huge strides made in technology we live in a scientifically illiterate society one that thinks about the world and
makes important decisions without taking scientific knowledge into account but is the solution to this illiteracy to deluge the
layman with scientific information or does science news need to be focused around specific issues and organized into stories
that are meaningful and relevant to people s lives in this unprecedented comprehensive look at a new field jane gregory and
steve miller point the way to a more effective public understanding of science in the years ahead

these days science is everywhere it pervades our whole society sometimes it is just a clutter of commonplace frivolities like
new fashion fabrics sometimes it miraculously preserves our life like penicillin sometimes like climate change it looms over us
as a portent of doom sometimes it promises a way of escape from such a fate sometimes like a nuclear warhead it enshrouds
us in political terror sometimes like a verification technology it offers an antidote to such evils how should we respond to this
ambiguous and ubiquitous thing called science

the unity of science has been a widely discussed issue both in the philosophy of science and within several sciences reductionism has often been seen as the means of bringing the different sciences to a fundamental unity by reference to some basic science but it shows many limitations multidisciplinary and interdisciplinarity have also been proposed as methodologies for attaining unity without underestimating the diversity of the sciences this volume starts with a clarification of the possible meanings of this unity and then discusses the features of the mentioned approaches to unity evaluating the success and the shortcomings of the unification programme among different sciences and within a single science

scientists in search of their conscience is the edited proceedings of the european symposium on the effects of science on society held in brussels in 1971 organised by the european committee of the weizmann institute israel the conference gave scientists from varied disciplines and many countries the platform from which to explore in depth the dilemma facing them the dilemma is the responsibility of scientists for society s use of scientific findings though no hard and fast conclusions were

reached in fact quite the contrary the discussions left no doubt that scientists were becoming aware that they can no longer claim that the pursuit of knowledge is divorced from its use yet should they begin to face the responsibility for the application of their work it is clear that their freedom will be impaired the loss of freedom is of course part of the dilemma of science contents official opening monday june 28 1971 1 chairman albert b sabin 3 speakers theo lefevre 7 altiero spinelli 11 morning session monday june 28 1971 13 chairman john c kendrew 15 speakers friedrich cramer can our society meet the challenge of a technological future 19 aharon katzir katchalsky a scientist s proach to human values 33 discussion 46 afternoon session monday june 28 1971 61 chairman hendrik b g casimir 61 speakers leon van hove physical science in relation to human thought and action 63 chairman i pekeris the impact of physical sciences on society 73 discussion
