adam smith's contribution to economics is well recognized yet scholars have recently been exploring anew the multidisciplinary nature of his works the adam smith review is a rigorously refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of adam smith's works his place in history and the significance of his writings to the modern world it is aimed at facilitating debate among scholars working across the humanities and social sciences thus emulating the reach of the enlightenment world which smith helped to shape

mohammad fadel's scholarship on islamic law and legal history ranges from medieval institutions and the history of islamic legal interpretation to urgent problems relating to the modern reception and re assessment of islamic legal doctrine fadel's intellectual concerns focus primarily on the compatibility of the islamic legal tradition with modern liberal political arrangements but in his research and writing he also delves into the realm of premodern islamic legal thought and institutions his rawlsian approach leads him to a political reading of the islamic legal tradition which he accomplishes by teasing out jurists assumptions about politics

economics and the domestic sphere fadel's readings of islamic legal sources suggest that islamic law remains relevant to a society in which legitimate disagreements over law and morality seem intractable at the same time from the rawlsian perspective he adopts fadel reminds us that premodern muslim jurists formulated islamic law also under conditions of substantial controversy over matters of law and morality as well as over questions of religion politics theology and metaphysics the studies gathered together in this volume adroitly illustrate fadel's interest in islamic law as a domain of islamic political thought and as a framework that might be deployed in today's pluralistic and secularized societies

this book explores innovative approaches to educational game development emphasizing practical solutions and transformative learning experiences as learning increasingly converges with digital culture game based learning and serious games offer compelling ways to spark curiosity cultivate systems thinking and resilience and create inclusive sustainable educational experiences the book is organized into three parts play learn and transform which are deliberately interwoven reflecting the fluid and iterative nature of game based learning as a holistic approach to education and social change first play advocates for a transformation in educational paradigms towards active experiential and playful learning methodologies the four chapters showcase a variety of strategies to stimulate engagement starting with hybrid settings and concluding with digital scenarios next learn delves into the intersection of educational game design and sustainability here the chapters challenge conventional paradigms by introducing more than human perspectives co creative approaches and immersive narratives lastly transform moves towards the broader societal impact of serious games highlighting their potential in shaping policy fostering inclusion and enhancing public understanding of environmental and governance issues the chapters in this part underscore how games engage diverse audiences and support collaborative learning and reveal how they can become platforms for collective inquiry systemic reflection and social change this book is intended for those committed to advancing education through purposeful play whether being a researcher seeking theoretical insights an educator designing a curriculum or a class intervention or a developer building the next generation of educational tools collectively the works in this volume reaffirm that game based learning is not merely a pedagogical technique but a medium for meaningful exploration practicing collaboration and supporting transformative learning

sea otters and polar bears are carnivorous marine mammals that still resemble their terrestrial ancestors compared with cetacea whales and dolphins sirenia dugongs and manatees and pinnipedia seals sea lions and walrus they are less adapted for an aquatic life and the most recently evolved among marine mammals sea otters are amphibious but seldom come ashore and polar bears primarily occur on sea ice or along the shore when at sea both species spend most of their time swimming at the surface or making short shallow dives when foraging or pursuing prey indeed polar bears rarely pursue seals in water nevertheless polar bears are powerful swimmers and will stalk seals from the water as with many other large carnivores they are solitary hunters although sea otters are gregarious and form aggregations at sea called rafts they are primarily asocial except during mating the principal interaction among sea otters occurs between a female and offspring during the six month dependency period in large carnivores e.g. wolves and lions that feed on ungulates sociality and cooperation are favored because of the need to capture large prey and defend carcasses polar bears which are the largest terrestrial carnivore are solitary hunters of seals and are neither gregarious nor social males and females briefly associate during courtship and mating during this time males

aggressively compete for females at other times males generally avoid each other except for aggregations of males that form while summering on land and females with cubs avoid males which are known for infanticide as with sea otters the interaction of polar bears outside of mating occurs between a female and her offspring during the 2 3 year dependency period this interaction is critically important when altricial cubs are born in the winter den this book provides new insight into the ethology and behavioral ecology of sea otters and polar bears each chapter reviews the discoveries of previous studies and integrates recent research using new techniques and technology the authors also address historic and current anthropogenic challenges for their survival as climate change alters entire marine ecosystems

jesus the wisdom of god brings together insights from wisdom literature and contemporary creation thought in a work that brilliantly illuminates an integrated ecological theology adding new depth to the ethical demands of our global ecological situation denis edwards argues that commitment to ecological praxis springs from the very center of christian identity in jesus trinity and humanity beginning with the wisdom tradition of the hebrew scriptures jesus the wisdom of god explores what it means to recover the notion that sophia wisdom became incarnate in jesus of nazareth and shows how the universe is altered by this incarnation wisdom christology then opens out into a view of the trinitarian god at work in ongoing creation edwards considers the implications of the trinitarian theology of richard of st victor and st bonaventure centering on the insight that every creature including humankind is the free self expression of the trinitarian god in this context humanity is revealed as integrally related to all of creation a part of a single cosmic story while at one with creation in evolutionary history humanity is at the same time creation come to self awareness this train of insights leads to principles for an ecological praxis that affirms human value while insisting that

humanity is a part of nature the whole reinforces commitment to sustainability and a franciscan attitude of reverence toward god s creation jesus the wisdom of god in a disciplined yet clear way crafts an alternative to the anthropocentrism and alienation of much of christian tradition by finding in the very roots of christian mysticism and christian identity a truly ecological theology for our time it is profound reading for students theologians and all christians concerned with ecology and with the interface of science and theology

a proliferation of press headlines social science texts and ethical concerns about the social implications of recent developments in human genetics and biomedicine have created a sense that at least in european and american contexts both the way we treat the human body and our attitudes towards it have changed this volume asks what really happens to social relations in the face of new types of transaction such as organ donation forensic identification and other new medical and reproductive technologies that involve the use of corporeal material drawing on comparative insights into how human biological material is treated it aims to consider how far human bodies and their components are themselves inherently social the case studies ranging from animal human transformations in amazonia to forensic reconstruction in post conflict serbia and the treatment of native american specimens in english museums all underline that without social relations there are no bodies but only human remains the volume gives us new and striking ethnographic insights into bodies as sociality as well as a potentially powerful analytical reconsideration of notions of embodiment it makes a novel contribution too to science and society debates

thornton takes a fresh look at important psychological and cultural issues in this novel arguing that although it may be a classic text of literary modernism it is a fundamentally antimodernist work this comprehensive and thoughtful book provides readers with a new cultural critique and intellectual history of portrait which promises to become one of the major discussions of the novel

transcultural perspectives in literature language art and politics is a contribution to the field of transcultural studies that has been gaining ground since the turn of the twentieth century embracing the transcultural lens in the humanities and social sciences it demonstrates how the relevance necessity and wide range of this approach can better enhance our understanding of the contemporary world as well as the past though all the contributors have a humanities background they work in different research fields such as literary studies linguistics translation studies cinema or intellectual history and use a variety of theoretical frames a transdisciplinary framework also seems to be the most practical one to meet the challenges that transcultural phenomena and developments present in sixteen chapters organized in five sections literature translation and linguistics cinema communication and politics the volume explores the dynamics of transculturality at a micro and macro level its benefits and limits these studies suggest that transculturality is not only used as an intellectual working tool but also as an identity in motion that may represent a glimmer of hope in a world that seems to be in the throes of unreason and on the brink of self induced destruction

in without a tear mark h bernstein begins with one of our most common and cherished moral beliefs that it is wrong to intentionally and gratuitously inflict harm on the innocent over the course of the book he shows how this apparently innocuous commitment requires that we drastically revise many of our most common practices involving nonhuman animals most people who write about our ethical obligations concerning animals base their arguments on emotional appeals or contentious philosophical assumptions bernstein however argues from reasons

but carries little theoretical baggage he considers the issues in a religious context where he finds that judaism in particular has the resources to ground moral obligations to animals without a tear also makes novel use of feminist ethics to add to the case for drawing animals more closely into our ethical world bernstein details the realities of factory farms animal based research and hunting fields and contrasting these chilling facts with our moral imperatives clearly shows the need for fundamental changes to some of our most basic animal institutions the tightly argued provocative claims in without a tear will be an eye opening experience for animal lovers scholars and people of good faith everywhere

animal characters abound in graphic narratives ranging from krazy kat and maus to we3 and terra formars exploring these and other multispecies storyworlds presented in words and images animal comics draws together work in comics studies narrative theory and cross disciplinary research on animal environments and human animal relationships to shed new light on comics and graphic novels in which animal agents play a significant role at the same time the volume s international team of contributors show how the distinctive structures and affordances of graphic narratives foreground key questions about trans species entanglements in a more than human world the writers artists covered in the book include nick abadzis adolpho avril jeffrey brown sue coe matt dembicki olivier deprez j j grandville george herriman adam hines william hogarth grant morrison osamu tezuka frank quitely yu sasuga charles m schultz art spiegelman fiona staples ken ichi tachibana brian k vaughan and others
