the popular image of the british raj an era of efficient but officious governors sycophantic local functionaries dotting amahs blisteringly hot days and torrid nights chronicled by forster and kipling is a glamorous nostalgic but entirely fictitious in this dramatic revisionist history jon wilson upends the carefully sanitized image of unity order and success to reveal an empire rooted far more in violence than in virtue far more in chaos than in control through the lives of administrators soldiers and subjects both british and indian the chaos of empire traces britain s imperial rule from the east india company s first transactions in the 1600s to indian independence in 1947 the raj was the most public demonstration of a state s ability to project power far from home and its perceived success was used to justify interventions around the world in the years that followed but the raj s institutions from law courts to railway lines were

designed to protect british power without benefiting the people they ruled this self serving and careless governance resulted in an impoverished people and a stifled society not a glorious indian empire jon wilson s new portrait of a much mythologized era finally and convincingly proves that the story of benign british triumph was a carefully concocted fiction here thoroughly and totally debunked

an immersive portrait of the lives of the british in india from the seventeenth century to independence who of the british went to india and why we know about kipling and forster orwell and scott but what of the youthful forestry official the enterprising boxwallah the fervid missionary what motivated them to travel halfway around the globe what lives did they lead when they got there and what did they think about it all full of spirited illuminating anecdotes drawn from long forgotten memoirs correspondence and government documents the british in india weaves a rich tapestry of the everyday experiences of the britons who found themselves in the jewel in the crown of the british empire david gilmour captures the substance and texture of their work home and social lives and illustrates how these transformed across the several centuries of british presence and rule in the subcontinent from the east india company s first trading station in 1615 to the twilight of the raj and partition and independence in 1947 he takes us through remote hill stations bustling coastal ports opulent palaces regimented cantonments and dense jungles revealing the country as seen through british eyes and wittily reveling in all the particular concerns and contradictions that were a consequence of that limited perspective the british in india is a breathtaking accomplishment a vivid and balanced history written with brio elegance and erudition

every generation needs to reinterpret its great men of the past akbar ahmed by revealing jinnah s human face alongside his heroic achievement both makes this statesman accessible to the current age and renders his greatness even clearer than before four men shaped the end of british rule in india nehru gandhi mountbatten and jinnah we know a great deal about the first three but mohammed ali jinnah the founder of pakistan has mostly either been ignored or in the case of richard attenborough s hugely successful film about gandhi portrayed as a cold megalomaniac bent on the bloody partition of india akbar ahmed s major study redresses the balance drawing on history semiotics and cultural anthropology as well as more conventional biographical techniques akbar s ahmad presents a rounded picture of the man and shows his relevance as contemporary islam debates alternative forms of political leadership in a world dominated at least in the western media by figures like colonel gadaffi and saddam hussein

the aftermath of partition in south asia draws upon new theoretical insights and fresh bodies of data to historically reappraise partition in the light of its long

aftermath

water resource conflicts and international security a global perspective is an edited collection by dhirendra k vajpeyi which analyzes the increasing global demand for water in economic and social development and the dire need to efficiently manage this vital natural resource particularly in water scarce countries in the middle east asia and africa several environmental and human induced factors such as urbanization industrialization climate change and agricultural needs have created a near crisis situation in many countries subsequently there is an increasingly intense competition to utilize available water resources in these most heavily affected regions transboundary rivers lakes and streams which are shared by more than one country pose potential for political conflict armed conflict and in the best of cases cooperation the contributors of water resource conflicts and international security present ten case studies in seven chapters highlighting the competition between countries in asia africa and the middle east in his conclusion dhirendra k vajpeyi suggests several policy measures that governments may implement in order to minimize the potential for conflict

the 1962 war was indeed a traumatic experience for the indian arms the story from the indian side is generally well known but very little is known about how the chinese planned and orchestrated the entire campaign while india held a firm belief till the very end that china would not resort to a large scale military action the chinese on the other hand had been preparing for it since 1959 even though the writing was on the wall indian army allowed itself to be hustled into a war on those high himalayas for which it was ill prepared a kind of hurtling towards a point of no return based on the chinese literature for the first time this book has been able to delve into the chinese thought process their grand strategy and reconstruct various battles across the entire front from chinese point of view of course tempered with what is known from authentic indian sources it is a narrative that is designed to fill a great void that has existed all these years about the 1962 indo china war

august 14 15 1947 reverberates with meaning for indian and pakistani people the date does more than mark the independence of india this momentous time marks the birth of two nation states india and pakistan and is fixed in the memory of many as partition and end of the raj bearing witness attempts to nuance this historical moment by considering contemporary and post event responses to partition which indians and pakistanis have inherited as one of uncontested significance from testimonials and speeches by jinnah and nehru to fictional and non fictional accounts by indians and the british and political cartoons that appeared in english newspapers at the time kamra offers an inductive study of primary texts that have been ignored until now the book studies the three groups most affected by the events of 1947 the british for whom this was the beginning

of exile the indian elite for whom the moment was a rite of passage and the survivors of partition for whom the event is inextricably linked with trauma and loss of home family and community author sukeshi kamra asks why do we not consider these valid and contesting readings in the teaching and learning of our history not doing so means that testimonials to partition such as narratives of trauma autobiographies as personal statements on a public moment and political cartoons as a minute by minute construction of history have yet to be considered

this is the brilliantly told story of one of the wonders of the modern world how in less than a hundred years the british made themselves masters of india they ruled it for another hundred departing in 1947 leaving behind the independent states of india and pakistan british rule taught indians to see themselves as indians and its benefits included railways hospitals law and a universal language but the raj outwardly so monolithic and magnificent was always precarious its masters knew that it rested ultimately on the goodwill of indians this is a new look at a subject rich in incident and character the india of the raj was that of clive kipling curzon and gandhi and a host of lesser known others raj will provoke debate for it sheds new light on mountbatten and the events of 1946 47 which ended an exercise in benign autocracy and an experiment in altruism

this collection is about those on the wrong side of the border apart from offering a perspective on displaced people and communities the stories talk about people as religious and linguistic minorities in post partition india and pakistan these narratives offer insights into individual experience and break the silence of the collective sphere
