conservative and progressive religious groups fiercely disagree about issues of sex and gender but how did we get here melissa j wilde shows how today's modern divisions began in the 1930s in the public battles over birth control and not for the reasons we might expect by examining thirty of america's most prominent religious groups from mormons to methodists southern baptists to seventh day adventists and many others wilde contends that fights over birth control had little to do with sex women's rights or privacy using a veritable treasure trove of data including census and archival materials and more than 10 000 articles statements and sermons from religious and secular periodicals wilde demonstrates that the push to liberalize positions on contraception was tied to complex views of race

immigration and manifest destiny among america s most prominent religious groups taking us from the depression era when support for the eugenics movement saw birth control as an act of duty for less desirable groups to the 1960s by which time most groups had forgotten the reasons behind their stances on contraception but not the concerns driving them birth control battles explains how reproductive politics divided american religion in doing so this book shows the enduring importance of race and class for american religion as it rewrites our understanding of what it has meant to be progressive or conservative in america

as this book shows between 1910 and 1942 social feminists in new jersey waged an unsuccessful campaign for legislation that would permit eugenic sterilization of feebleminded and other undesirable citizens church archives and religious periodicals described the conflict between catholic and protestant citizens regarding this issue reform minded women persisted in their quest for such progressive state legislation despite repeated failures their number of potential voters was very small compared to the organized bloc of catholic citizens who viewed such legislation as immoral and based on bad science and threatened to unseat any legislator who supported such a notion this insightful text highlights that public officials would only enact such laws when they were convinced that many citizens supported a particular eugenic goal and then would vote for legislators who satisfied this moral challenge public opinion was unprepared for such radical legislation in new jersey and legislators learned that to even consider a eugenic sterilization notion would be political suicide
