experimental economics involves the use of controlled experimental methods both in the laboratory and the field to better comprehend how individuals and groups make economic decisions and to more clearly identify causal relationships this book takes the reader to the frontier of

research in this exciting and rapidly growing field unlike other texts this book discusses both the methodology of experimental economics and some of the main application areas the material is organized as a series of 12 chapters or lectures that can be covered in a single academic term the first five chapters cover the reasons for experimentation as well as basic experimental methodology the last seven chapters discuss applications of experimental economics to areas such as game theory public economics social preferences auctions and markets the book assumes only a basic knowledge of economics and game theory and is written at a level that is suitable for advanced undergraduate master s or phd students

this set of lecture notes contains basic theory in environmental and resource economics it covers not only the traditional topics pollution targets and instruments renewable and non renewable resources growth trade and valuation but also the newer topics international aspects stock pollution and tipping points the lectures focus on the main concepts models and results in the core areas of environmental and resource economics and form the basis for extensions applications and policy issues in the courses the book is compact and can serve as a basic text for a course in environmental and resource economics at the advanced undergraduate level it can also be useful as a reference text at the graduate level or for research the mathematics in the main text is elementary with more advanced mathematical analyses in the appendices the book provides a precise account of the essentials in environmental and resource economics

that mistakes are made is clear what is meant by that is not measuring whatever might be meant and scientifically studying it is therefore even more challenging these lectures introduce an interdisciplinary science of mistakes to cut the gordian knot the key building blocks are model constructs drawn from the economic tradition methods of measurement drawn from the psychometric tradition and analytic methods drawn from economic theory

ariel rubinstein s well known lecture notes on microeconomics now fully revised and expanded this book presents ariel rubinstein s lecture notes for the first part of his well known graduate course in microeconomics developed during the fifteen years that rubinstein taught the course at tel aviv university princeton university and new york university these notes provide a critical assessment of models of rational economic agents and are an invaluable supplement to any primary textbook in microeconomic theory in this fully revised and expanded second edition rubinstein retains the striking originality and deep simplicity that characterize his famously engaging style of teaching he presents these lecture notes with a precision that gets to the core of the material and he places special emphasis on the interpretation of key concepts rubinstein brings this concise book thoroughly up to date covering topics like modern choice theory and including dozens of original new problems written by one of the world s most respected and provocative economic theorists this second edition of lecture notes in microeconomic theory is essential reading for students teachers and research economists fully revised expanded and updated retains the engaging style and method of rubinstein s well known lectures covers topics like modern choice theory features numerous original new problems including 21 new review problems solutions

this lecture notes provides an overview of budgeting and financial management in the public and non profit sectors fundamental concepts and practices of budgeting financial management and public finance are introduced with special emphasis on state and local government budgeting and financial management in the united states the objectives of courses in public budgeting and this title are to teach the basic concepts and nomenclature of public finance to develop an understanding of budget processes as well as the sources and uses of public revenues and to make relatively simple but useful computations in an intelligent way key course learning outcomes include the abilities to there are no indispensable pre requisites by the reader and it has been designed for students from a wide variety of backgrounds and undergraduate majors although this works well as an introductory text to a broader public administration curriculum it also can make sense for students to take after some more basic courses in economics policy analysis and public organizations issues of tax incidence and the effect of taxes on economic efficiency can be covered in greater depth

lecture notes in urban economics and urban policy provides a wide ranging introduction to urban economics and urban policy by professor john yinger one of the world s leading scholars in urban economics it draws on his extensive teaching and publication record to provide detailed lecture notes for both a phd level course in urban economics and a master s level course in urban policy both the us and the world populations are becoming more and more urbanized and these notes are designed to help scholars learn and teach about the factors that determine urban residential structure and that lead to urban problems such as inadequate housing concentrated poverty an inequitable distribution of local public services racial and ethnic discrimination in housing and traffic congestion although these notes focus on the us many of the lessons in the notes apply to other countries as well they also draw on professor yinger s extensive teaching experience and publication record in urban economics and should prove useful to many scholars who want to teach about or study urban areas

this book is based on lectures conducted for two classes at the maxwell school syracuse university a public finance seminar for phd students in public administration and state and local public finance for master s students in public administration topics covered include the role of voters in a federal system the sorting of different households into different communities the determinants of public service costs the property tax and other sources of local and state revenue fiscal aspects of economic development and intergovernmental aid especially for education the notes for the ph d class also cover several more advanced topics such as the estimation of education production and cost functions the capitalization of school quality into house values and tax competition among jurisdictions the focus in these notes is on the highly decentralized federal system in the united states but many of the principles and much of the behavioral analysis in the class apply to other countries as well these notes draw on professor yinger s extensive teaching experience and publication record in state and local public finance they should prove useful to many teachers scholars and students who find topics in state and local public finance that they wish to pursue

people pursue their own interests whatever those interests might be some people have interests that are narrow and selfish while others have interests that are broad and altruistic the idea that people are self interested underpins all of economic analysis and raises two fundamental questions 1 how do people choose the actions they think will further their own interests 2 can the potentially conflicting interests of different people be made to mesh in some sort of socio economic equilibrium this book is devoted to a detailed study of the first question its companion volume economy wide microeconomics equilibrium optimality applications and tests makes a detailed study of the second question following some foundational remarks this book studies the arrow debreu theory of consumer choice that theory supposes people choose so as to maximize a complete continuous transitive and reflexive binary preference relation over a non empty and compact choice set the book then studies numerous refinements generalizations and extensions of each of these restrictions up to and including recent work on behavioral theories of choice and choice behaviour when preferences are intransitive incomplete discontinuous also considered is choice behaviour in environments that are not necessarily compact a study is also made of intertemporal choice and choice under uncertainty the study of arrow debreu choice theory and its extensions are presented from the primal dual and revealed preference points of view consumers are not the only agents in the economy as producers are present as well beginning with a study of the arrow debreu idea that producers choose from a convex production set so as to maximize profit the book considers extensions and generalizations of this framework particularly to non convex environments the study is presented from the primal and dual points of view the final chapter in the book provides a link to its companion volume the chapter indicates how the theories of consumer and producer choice studied here help inform answers of the second question posed above resources are available to instructors who adopt this book more details at worldscientific.com/worldscibooks/10.1142/12789 sm
