Human beings have to ask how faith is possible in this mixed world of trouble and joy. A safe universe with no scope for adversity would be a mechanical toy, not a creation. A glorious universe will be a place where troubles have eventually been overcome. Christians believe in one God who is three persons: God the Heavenly Father, took the risk of making a real world full of living people capable of happiness. Jesus Christ, God the Son, came as a human being to take responsibility for creation; he suffered and died, and he rose from death to vindicate the whole enterprise and show that creation can and will be made good. People are not left to work out their own faith but are invited to belong to the Church in order to keep in touch with God the Spirit. They are to behave as God's children, not by rule-bound conformity but by grateful response to the glory of God the Holy Trinity.

The new edition of this celebrated anthology surveys the Western philosophical tradition from its origins in ancient Greece to the work of today's leading philosophers. Western philosophy: an anthology provides an authoritative guided tour through the great tradition of Western philosophical thought. The seminal writings of the great philosophers, along with more recent readings of contemporary interest, are explored in 144 substantial and carefully chosen extracts, each preceded by a lucid introduction guiding readers through the history of a diverse range of key arguments and explaining how important theories fit into the unfolding story of Western philosophical inquiry. Broad in scope, the anthology covers all the main branches of philosophy: theory of knowledge and metaphysics, logic and language, philosophy of mind, the self and freedom, religion and science, moral philosophy, political theory, aesthetics, and the meaning of life. All in self-contained parts which can be worked on by students and instructors independently. The third edition of the anthology contains newly incorporated classic texts from thinkers such as Aquinas, Machiavelli, Descartes, William James, and Wittgenstein. Each of the 144 individual extracts is now followed by sample questions focusing on the key philosophical problems raised by the excerpt, and accompanied by detailed further reading suggestions that include up-to-date links to online resources. Also new to this edition is an introductory essay written by John Cottingham which offers advice to students on how
