from Tolkien to Star Trek from Game of Thrones to Battlestar Galactica and from The Walking Dead to Janelle Monáe's Afrofuturist concept albums Transmedia World Building offers us complex and immersive environments beyond capitalism. This book examines the ways in which these popular storyworlds offer tools for anticapitalist theory and practice building on Hardt and Negri's theory of global capitalism. Science fiction, fantasy, and politics shows how transmedia world building has the potential of offering more than a momentary escape from capitalist realism in the age of media convergence and participatory culture. The book features eight fantastic storyworlds that offer vivid illustrations of global capitalism's contradictory logic. Approaching transmedia world building both as a cultural form and as a political economy, it demonstrates the limitations inherent in fandom and fan culture, which is increasingly absorbed as a form of immaterial labor. But at the same time, the book also explores the productive ways in which fantastic storyworlds contain a radical energy that can give us new ways of thinking about politics, popular culture, and anticapitalism.

Concerned with the nature of the medium and the borders between fact and fiction, reflexivity was a ubiquitous feature of modernist and postmodernist literature and film. While in the wake of the post-postmodern return to the real, cultural criticism has little time for discussions of reflexivity, it remains a key topic in narratology, as does fictionality. The latter is commonly defined in opposition to the real and the factual but remains conditioned by historical, cultural, discursive, and medium-related factors. Reflexivity blurs the boundaries between fact and fiction, however, by giving fiction a factual edge or by questioning the limits of factuality in non-fictional discourses. Fictionality, factuality, and reflexivity thus constitute a complex triangle of concepts, yet they are rarely considered together. This volume fills this gap by exploring the intricacies of their interactions and interdependence in philosophy, literature, film, and digital media, providing insights into a broad range of their
