securitization once a fairly straightforward means of offering collateral for investment has mushroomed into a massively complex area of financial practice the central role occupied by such risk distributing products as collateral debt obligations cdos credit default swaps cdss collateral loan obligations clos and credit derivatives has given rise to one of the most crucial inquiries of our era is the financial collapse that threatens the world financial system due merely to rogue traders or is there something in the derivative idea itself that spells inevitable disaster most important can we isolate the truly productive aspects of securitization and learn to recognise pitfalls in advance as always in such ideational minefields it is the legal practitioners who are expected to provide guidance to distressed investors and asset dealers hence this vital new book written from a distinctly practical point of view by jan job de vries robb with contributions from paul ali and tim coyne all three leading authorities with extensive experience as counsel both in house and in private practice in addition to sterling academic credentials the book sheds clear light on every aspect of today s securitization techniques including welcome guidance on the following keeping track of exposure to the cdo market and evaluating such emerging asset classes as commodity risk microfinance and project finance risk in the course of the analysis the book proceeds from the relevant framework and guiding legal principles through key risks and building blocks in securitization transactions to the various product classes and sub classes and their differences and common denominators non credit risk and niche products such as fund and insurance securitization are also covered the final chapters are devoted to the applicable rules as laid down in basel ii and international financial reporting standards

the question of what constitutes fraud in the transaction with respect to international letters of credit varies considerably among jurisdictions in proving allegations of fraud it is crucial for the practitioner to know the relevant jurisdiction s case law especially if wider defences such as inducement unconscionable conduct or bad faith must be invoked in this book the author argues that whereas fraud in the documents is generally sufficient in cases involving commercial letters of credit standby letters of credit demand a wider fraud exception the central issue how wide that fraud exception should be is what this book explores in depth this author compares and critically examines the application of the fraud exception in four major trade jurisdictions the united states england canada and australia with

an overall focus on how each jurisdiction's fraud tests treat the autonomy of standby letters of credit she builds her arguments on such relevant sources and concepts as the following when it can be shown that the beneficiary has no bona fide belief in the validity of its claim demand guarantees international initiatives icc rules and the un convention on independent guarantee and standby letters of credit the sztejn rule parameters of the fraud in the transaction defence materiality standard prerequisites for injunctive relief arguing fraud in the formation of the contract performance bond cases applying the breach of good faith defence negative stipulation in the underlying contract and equitable versus statutory broader notion of unconscionability the presentation includes detailed summaries and analyses of leading cases in all four jurisdictions lawyers and corporate counsel responsible for arguing claims or defences in letter of credit transactions will welcome the way the author's research and insight define the range of options in each case they handle academics also will appreciate the systematic way the book frames a complex area of international trade law

this book presents the first thoroughgoing analysis of the contractual effect of letters of comfort as it appears in both common law and civil law systems the commentary draws on cases from a wide variety of jurisdictions and on the full range of legal scholarship on the subject in several languages among the specific issues and topics raised along the way are the following the typology of letters of comfort the legal nature of letters of comfort the use of letters of comfort in corporate group and banking practice the economic explanation for the use of letters of comfort the contractual effect of letters of comfort in french law ten commandments of letters of comfort clearly evoking the tension between business needs the law and judicial application the book analyses what happens when the relationship between a lender and a creditor breaks down or the latter becomes insolvent and courts or arbitrators are asked to determine the legal status of a comfort letter this is an area of practice in which lawyers in any field of business activity are inevitably concerned and in which useful guidance is scarce for this reason this detailed analysis will be very welcome

we seem to be living at a time when insurance is strained to the breaking point from hurricanes and earthquakes to terrorist attacks and threats of nuclear devastation enormous risks to life and property and accompanying liabilities proliferate on an unprecedented scale insurer insolvency is not yet common but it is not unusual either and at the root of such failures often lies the compound failure of uncollectable reinsurance this important book proposes that a significant part of the emerging insurance crisis results from inadequate regulation of reinsurance in a detailed and cogent analysis of what an effective regulatory regime for reinsurance must entail the author examines such factors as the following direct supervision of reinsurers versus supervision of reinsurance policies models from developed

countries us uk eu and international organisations organization for economic cooperation and development international association of insurance supervisors the importance of taking legal and economic differences into account while applying models the problem of local protectionism especially in developing countries the dismantling of trade barriers in the reinsurance industry global harmonization of reinsurance regulation the role of reinsurance intermediaries finite risk reinsurance insurance linked securities the author s concluding chapter presents an essential legal infrastructure that allows for efficiency security and individual market characteristics professor wang then applies this framework to the taiwanese insurance market demonstrating convincingly how his proposed regime can solve specific problems while respecting taiwan s distinct market environment as a meticulously considered appraisal of and solution to a world problem that is growing quickly and uncontrollably reinsurance regulation will be of immense value to lawyers professors academics and officials who deal with any facet of economic law

despite a clear distinction in law between equity and debt the results of such a categorization can be misleading the growth of financial innovation in recent decades necessitates the allocation of control and cash flow rights in a way that diverges from the classic understanding some of the financial instruments issued by companies so called hybrid instruments fall into a grey area between debt and equity forcing regulators to look beyond the legal form of an instrument to its practical substance this innovative study by emphasizing the agency relations and the property law claims embedded in the use of such unconventional instruments analyses and discusses the governance regulation of hybrids in a way that is primarily functional departing from more common approaches that focus on tax advantages and internal corporate control the author assesses the role of hybrid instruments in the modern company unveiling the costs and benefits of issuing these securities recognizing and categorizing the different problem fields in which hybrids play an important role and identifying legal and contracting solutions to governance and finance problems the full scale analysis compares the u k law dealing with hybrid instruments with the corresponding law of the most relevant u s jurisdictions in relation to company law the following issues among many others are raised decisions under uncertainty when the risks of opportunism of the parties is very high contract incompleteness and ex post conflicts protection of convertible bondholders in mergers and acquisitions and in assets disposal use of convertible bonds to reorganise and restructure a firm timing of the conversion and the issuer s call option majority minority conflict in venture capital financing duty of loyalty fiduciary duties to preference shareholders and financial contract design for controlling the board s power in exit events throughout the analysis includes discussion comparison and evaluation of statutory provisions existing legal standards and strategies for protection it is unlikely that a more thorough or informative account exists of the complex regulatory problems created by hybrid financial instruments and of the different ways in

which regulatory regimes have responded to the problems they raise because business parties in these jurisdictions have a lot of scope and a strong incentive to contract for their rights this book will also be of uncommon practical value to corporate counsel and financial regulators as well as to interested academics

archaeologists have a history of being prime agents of change particularly in advocating for protection and preservation of historical resources as more social issues intersect with archaeology and historical sites we see archaeologists and others continuing to advocate for not only historic resources but for the larger social justice issues that threaten the communities in which these resources reside inspired by the idea of revolution and excitement about the ways archaeology is being used in social justice arenas this volume seeks to visualize archaeology as part of a movement by redefining what archaeology is and does for the greater good

présentation de l éditeur in an examination that is at once critical comparative and interdisciplinary the book discusses the stated objectives of the eu issuer disclosure regime principally about retail investor protection and then goes on to identify objectives that can actually be met in practice i e market efficiency and corporate governance the author concludes by drawing concrete policy and regulatory implications along the way covering such aspects and ramifications of the regime in its defence of the power of market forces as regulatory means and its clear argument that market finance should be seen at a minimum as a useful complement to bank credit and other financing sources this important book can claim a privileged space in the debate over the role of disclosure requirements in securities regulation
