user interfaces ui of applications since about 2010 are usually implemented by dedicated frontend programs following a rich client architecture and are based on the technologies html css and javascript this approach provides great flexibility and power but comes with an inherent great overall complexity of uis running on a continuously changing technology stack this is because since over twenty years technologies still progress at an extremely high invention rate and unfortunately at the same time still regularly reinvent part of their self this situation is harmless for small uis consisting of just a handful dialogs and having to last for just about one or two years however it becomes a major hurdle for large uis consisting of a few hundred dialogs and having to last for five or more years this is especially the case for the complex uis of industrial business information systems the main scientific contribution of this dissertation is the hierarchical user interface component architecture huica a scalable software architecture for rich client based user interfaces it is primarily based on the important architecture principle separation of concerns soc the derived idea of hierarchical composition the invented design pattern model view controller component tree mvc ct and the existing concepts presentation model and data binding

structure in the sea the science technology and effects of purpose built reefs and related surfaces provides a review of the history development status and emerging trends in research technology and applications of artificial reef habitats and sea floor structures the book helps readers understand utilize and add to the research of modern reef deployment efforts presenting a guide to equip stakeholders requiring technical foundations and best practices topics include materials designs and construction methods along with the ecology of these structures including key aspects of the life history of plants and animals associated with artificial reefs rigorous research addressing ecological economic and engineering questions coupled with the innovative deployment of structures worldwide by diverse stakeholders have created a synergy that makes the book a valuable synthesis and analysis for this growing subject thus its broad audience includes marine coastal and ocean environmental sciences including

aquatic ecologists those working in ocean sustainability and conservation benthic habitat and coral reef restoration practitioners and more presents a new perspective on how we might save natural wonders under threat provides a representation of reefs showing the economic and humanitarian value of these natural ecosystems unlocks potentials for solutions for conservation by including global case studies

a social accounting matrix sam is a representation of an economy that shows the circular flow of all transfers and real transactions between sectors and institutions the sam which is a square matrix describes the flows of incomes from activities taking the form of factor remunerations that are consequently received by the households for consumption on goods and services the accounts in the sam are the production activities commodities institutions and factors of production according to data availability the production activities can be further disaggregated to include more detailed information on sub sectoral or regional production similarly the factors of production could be differentiated by the level of skills or the location of employment households can be disaggregated by income quintiles or by rural and urban residence

the industrial revolution 4 0 will not only cause job losses but will also create new workspaces that may not exist today it also needs to be considered by accountants in government because the processes of budget planning budget execution and financial reporting have used a large number of information systems in the era of the industrial revolution 4 0 the changes will be faster marked by the emergence of such systems as supercomputers smart robots cloud computing big data systems genetic engineering and the development of neurotechnology that allows humans to optimize brain function further industrial revolution 4 0 will disrupt the accounting profession this proceedings provides selected papers research on government accounting accountability and integrity public sector accounting financial accounting accounting information system auditing and assurance corporate sustainability forensic and management accounting public and corporate finance taxation and customs open innovation in public sector accounting the proceedings provide details beyond what is possible to be included in an oral presentation and constitute a concise but timely medium for the dissemination of recent research results it will be invaluable to professionals and academics in the field of accounting finance and the public sector to get an understanding of recent research

economic development has long been acknowledged for its beneficial effects on human well being in the context of economic globalization and vertical specialization increasing the quality of export products is more critical and necessary to export success and sustainable development the product s quality is inextricably linked to its manufacture and production which need various types of energy and raw materials meanwhile the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production therefore product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources sustainable production and environmental regulations as well as the nature of export competitiveness generally export product quality has referred to the quality of manufactured products within the product lines quality refers to the relative price of a country s varieties within their respective product lines product sophistication assesses the composition of the aggregate exports different varieties of same product as per quality level are being produced by several developing and emerging economies within any given product line quality converges both conditionally and unconditionally to the world s benchmark increases in institutional quality and human capital are associated with faster quality upgrading in turn faster growth in quality is associated with more rapid output growth

the world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain this provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and knowledge structures in a way that is appropriate for delivering value to the customer it must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services thus unlearning forgetting becomes a critical means for organizational success the eckm community of scholars has already initiated dialogue that links its particular strengths to innovation issues this conference aims to further that dialogue by attracting leading edge work that leverages the eckm community s in depth understanding of learning and unlearning to better understand knowledge management our aim is to stimulate breakthrough research streams linking learning unlearning and knowledge management how can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes building upon existing work on knowledge management km and organizational learning the conference will promote interdisciplinary approaches from computer science and information systems business management and organization science as well as cognitive science emphasis will be put on systematic learning from experience km tools and km success factors a special interest belongs to knowledge management initiatives which are lightweight i e do not place considerable additional burden on users and km experts allow an incremental adoption i e do not require large up front investment before any return of investment is at least visible and are flexible regarding frequent changes in experts and topics continuing the success of the eckm conference series since 2000 the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations
