the broad aim of this book is to provide a general basis for comparatively analysing and understanding the french riots of october november 2005 and the corresponding british disorders which occurred in the spring summer of 2001 the first of the french riots broke out on 27 october in the north parisian banlieue suburb of clichy sous bois when two teenage youths of muslim heritage were electrocuted in a substation while fleeing from the police the two youths had apparently become unwittingly involved together with their friends in a police investigation of a break in it is not clear whether they had actually been chased by police officers nevertheless a rumor to this effect quickly circulated the locality provoking violent confrontation between youths and police three more weeks of rioting then ensued in neighbouring parisian suburbs and other major french cities with similar concentrations of ethnic minorities the riots invariably involved thousands of youths from poorer areas who confronted the police set fire to local buildings and ignited hundreds of motor vehicles further rioting though not on the same scale as in 2005 occurred subsequently in 2006 and 2007 england and wales have had their own counterparts to the french riots in the early and mid 1980s there were a number of clashes between police and african caribbean youths in inner city areas further in 2001 rioting broke out in the northern mill towns and cities of bradford burnley leeds and oldham all of these later instances involved youths from pakistani or bangladeshi descent in contrast to the riots that occurred in france though a contributing factor to 2001 riots was the activities of white neo fascists many official reports and academic studies followed each

wave of disorder each questioning the effectiveness of Britain's multicultural society in addition to other possible factors such as the marginalisation and criminalisation of minority ethnic youth and their relations with the police such issues were again on the agenda after more rioting occurred in the Lozells area of Birmingham in 2005 unlike the previous disorders this entailed conflict between South Asian and African Caribbean youths following a rumor that a young African girl had been gang raped by South Asians British attempts to analyse and remedy the underlying causes of the riots constitute a potentially valuable resource to French academics practitioners and policy makers in turn the French experience provides a fertile basis for re-applying testing and enhancing existing British theory and policy the book consists of a highly coherent theoretically rich and thematically comprehensive collection of papers which provide an unparalleled description and comparative analysis of the French and British riots along with social policy recommendations to help to address the underlying issues

this book originally published in 1991 assesses how attitudes political orientations and social values changed during the five decades after the Second World War the case studies in the book focus on key sites in political culture in France on the extreme right the cinema the impact of media personalities and changes of political discourse in Germany on the decline of regional identities the emergence of specific issues and the concern of political parties with the effectiveness of language this interdisciplinary study provides new insights into the way French and German people see themselves

the transformation of citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century these volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights arguing from different scientific perspectives rather than offering new

conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions this volume political economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens as neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society its consequences for citizenship as a social institution are no less than dramatic against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights this book will appeal to academics working in the field of political theory political sociology and european studies
