in the commander in chief test jeffrey a friedman offers a fresh explanation for why americans are often frustrated by the cost and scope of us foreign policy and how we can fix that for the future americans frequently criticize us foreign policy for being overly costly and excessively militaristic with its rising defense budgets and open ended forever wars us foreign policy often appears disconnected from public opinion reflecting the views of elites and special interests rather than the attitudes of ordinary citizens the commander in chief test argues that this conventional wisdom underestimates the role public opinion plays in shaping foreign policy voters may prefer to elect leaders who share their policy views but they prioritize selecting presidents who seem to have the right personal attributes to be an effective commander in chief leaders then use hawkish foreign policies as tools for showing that they are tough enough to defend america s interests on the international stage this link between leaders policy positions and their personal images steers us foreign policy in directions that are more hawkish than what voters actually want combining polling data with survey experiments and original archival research on cases from the vietnam war through the occupations of iraq and afghanistan friedman demonstrates that public opinion plays a surprisingly extensive and often problematic role in shaping us international behavior with the commander in chief test a perennial point of debate in national elections friedman s insights offer important lessons on how the politics of image making impacts foreign policy and how the public should choose its president

western civilization was for centuries held together by the glue of christianity the religion founded upon the teachings and actions of jesus to the extent that it may be possible to infer them from the written record this book has grown out of the conviction that the methods of history in particular and of the sciences secondarily have not been applied forcefully enough to an investigation of jesus we will scrutinize this written record and see how much we actually know this book is in part a confession a literary genre that goes back to augustine bishop of hippo in north africa and catholic saint yet my agenda differs from his augustine lived at a time when the christian church was beginning to flex its muscles and make bold claims today we live in the twilight of the gods to borrow the title of one of friedrich nietzsche s last works religion as a general construct peaked long ago probably before the enlightenment and is now in retreat this period of decline and demise makes essential at long last a realistic treatment of jesus of nazareth as an italian by birth and upbringing the author was early baptized into the catholic church then his mother died at age 43 he was 15 years old himself at the time and didn t know how to reconcile the notion of a good just loving god with such a tragedy seeking to know whether the jesus of the written records can withstand the scrutiny of the sciences and history he eventually found what is the most probative way of examining jesus a task that forms the core of this book a very long time ago humans had little more than faith to guide them chris does not write for that mindset but aims to entertain other methods of understanding what we call reality with the sciences philosophy and history as our guides he
