this book provides two conceptual frameworks for further investigation of map literacy and fills in a gap in map literacy studies addressing the distinction between reference maps and thematic maps and the varying uses of quantitative map literacy qml within and between the two the text offers two conceptual frameworks and uses specific map examples to explore this variability in map reading skills and knowledge with the goal of informing educational pedagogy and practices within geography and related disciplines the book will appeal to cartographers and geographers as a new perspective on a tool of communication they have long employed in their disciplines and will also appeal to those involved in the educational pedagogy of information and data literacy as a way to conceptualize the development of curricula and teaching materials in the increasingly important arena of the interplay between quantitative data and map based graphics the first framework discussed is based on a three set venn model and addresses the content and relationships of three literacies map literacy quantitative literacy and background information as part of this framework the field of qml is introduced conceptualized and defined as the knowledge concepts skills and facts required to accurately read use interpret and understand the quantitative information embedded in geographic backgrounds the second framework is of a compositional triangle

based on 1 the ratio of reference to thematic map purpose and 2 the level of generalization and or distortion within maps in combination these two parameters allow for any type of map to be located within the triangle as a prelude to considering the type and level of quantitative literacy that comes into play during map reading based on the two frameworks mentioned above the pedagogical tool of word problems is applied to map literacy in an innovative way to explore the variability of map reading skills and knowledge based on specific map examples

this book is about skateboard video and experimental ways of thinking about cities it makes a provocative argument to consider skate video as an archive of the city from below here below has a dual meaning first below refers to an unofficial archive a subaltern history of urban space second below refers to the angle from which skateboarders and filmmakers gaze upon capture and consume the city from the ground up since taking to the streets in the early 1980s skateboarding has been captured on film video tape and digital memory cards edited into consumable forms and circulated around the world videos are objects amenable to ethnographic analysis while also archiving exercises in urban ethnography by their creators i advocate for taking skate video seriously as a fragile archive of the urban backstage collective memory across time and space creative urban practice urban encounters people to people and people to object s and the globalization of a subculture at once delinquent and magnificent

while the questions of ethics have become increasingly important in recent years for many fields within the humanities there has been no single volume that seeks to address the emergence of this concern with ethics across the disciplinary spectrum given this lack in currently available critical and secondary texts and also the urgency of the issues addressed by the critics assembled here the time is right for a collection of this nature

algebraic k theory encodes important invariants for several mathematical disciplines spanning from geometric topology and functional analysis to number theory and algebraic geometry as is commonly encountered this powerful mathematical object is very hard to calculate apart from quillen's calculations of finite fields and suslin's calculation of algebraically closed fields few complete calculations were available before the discovery of homological invariants offered by motivic cohomology and topological cyclic homology this book covers the connection between algebraic k theory and böckstedt's hsiang and madsen's topological cyclic homology and proves that the difference between the theories are locally constant the usefulness of this theorem stems from being more accessible for calculations than k theory and hence a single calculation of k theory can be used with homological calculations to obtain a host of nearby calculations in k theory for instance quillen's calculation of the k theory of finite fields gives rise to hesselholt and madsen's calculations for local fields and voevodsky's calculations for the integers give insight into the diffeomorphisms of manifolds in addition to the proof of the full integral version of the local correspondence between k theory and topological cyclic homology the book provides an introduction to the necessary background in algebraic k theory and highly structured homotopy theory collecting all necessary tools into one common framework it relies on simplicial techniques and contains an appendix summarizing the methods widely used in the field the book is intended for graduate students and scientists interested in algebraic k theory and presupposes a basic knowledge of algebraic topology

plant diseases and pests cause significant losses to farmers and threaten food security worldwide monitoring the growing conditions of crops and detecting plant diseases is critical for sustainable agriculture traditionally crop inspection has been carried out by people with expert knowledge in the field however regarding any activity carried out by humans this activity is prone to errors leading to possible incorrect decisions innovation is therefore an essential fact of modern agriculture in this context deep learning has played a key role in solving complicated applications with increasing accuracy over time and recent interest in this type of technology has prompted its potential application to address complex

problems in agriculture such as plant disease and pest recognition although substantial progress has been made in the area several challenges still remain especially those that limit systems to operate in real world scenarios
