shifting the focus from land to sea when considering the cold war in east asia kuan jen chen sheds light on the importance of the oceanic lens as a structural imperative in grand strategic thinking despite extensive scholarship on postwar us east asia relations questions about the relationship between maritime space national sovereignty and geopolitics have not been fully explored drawing on archives in chinese english and japanese chen uses the western pacific as a historical platform illustrating the relationship between the geopolitical value of the sea and the strategic deliberations of american and east asian decision making the recent deterioration of us china relations has turned maritime east asia into a powder keg with no country in the region able to remain neutral by anchoring today s maritime east asia in the past this book traces the evolution of historical factors that led to the current status quo in the western pacific and shows the origins of controversial issues in the region

he writes history like nobody else he thinks like nobody else he sees the world as a whole with its limitless fund of stories bryan appleyard sunday times where have the people in any particular place actually come from what are the historical complexities in any particular place this evocative historical journey around the world shows us human history is a tale not just of constant change but equally of perpetual locomotion writes norman davies throughout the ages men and women have endlessly sought the greener side of the hill their migrations collisions conquests and interactions have given rise to the spectacular profusion of cultures races languages and polities that now proliferates on every continent this incessant restlessness inspired davies s own after decades of writing about european history and like tennyson s ageing ulysses longing for one last adventure he embarked upon an extended journey that took him right round the world to a score of hitherto unfamiliar countries his aims were to test his powers of observation and to revel in the exotic but equally to encounter history in a new way beneath another sky is partly a historian s travelogue partly a highly engaging exploration of events and personalities that have fashioned today s world and entirely sui generis davies s circumnavigation takes him to baku the emirates india malaysia mauritius tasmania tahiti texas madeira and many places in between at every stop he not only describes the current scene but also excavates the layers of accumulated experience that underpin the present he tramps round ancient temples and weird museums summarises the complexity of indian castes austronesian languages and pacific explorations delves into the fate of indigenous peoples and of a missing malaysian airliner reflects on cultural conflict in cornwall uncovers the nazi origins of frankfurt airport and lectures on imperialism in a desert oasis everything has its history he writes including the history of finding one s way or of getting lost the personality of the author comes across strongly wry romantic occasionally grumpy but with an endless curiosity and appetite for knowledge as always norman davies watches the historical horizon as well as what is close at hand and brilliantly complicates our view of the past

economic reforms in china began in 1979 and initiated some of the most fundamental changes ever to occur in any country while allowing some of the most astonishing economic growth the world has seen they have also induced some of the most profound social and environmental shifts

where development is concerned our language and perhaps our way of thinking often appear somewhat distorted if anything the asian economies with their most impressive and dynamic growth should logically be called developing countries instead we call them threshold countries newly industrializing countries nics or newly industrializing economies the latter term taking into account the chinese argument that hong kong and taiwan should not be considered countries during the eighties when latin american nics became the main victims of the debt crisis the nics of east asia eanies the little tigers or dragons presented most impressive examples of growth through orientation to world trade fitting well into the japanese flying geese concept naturally questions were raised as to the reasons for this success the lessons other countries could draw from it and the outlook for the future at the same time the established industrial countries wanted to know what nie competition might mean for them in 1988 the oecd published a study entitled the nics challenge and opportunity for oecd industries the nics had become a fashionable object of research and debate in western europe where countries are preparing for a period of further integration and east west cooperation it seems worthwhile to also consider the role of the eanies and the options for cooperation they represent moreover the nics themselves are following development in europe with some concern and are trying to adjust to the new situation as it emerges
