the nursing process generally is understood as key element of professional nursing care in germany this study follows this argument back to the introduction of the nursing process in the 1970s and 1980s at that time the german healthcare system underwent dramatic changes and economic reorganization which can be understood as the emergence of the neoliberal rationale in germany the argument of cost explosion was used to restructure hospitals into enterprises that were to operate based on the logic of the market its cybernetic logic made the nursing process an ideal instrument to restructure nursing care perspectives of governmentality and critical accounting reveal the nursing process as an accounting tool which has made nursing calculable and while german nurses valued its potential for professionalization the findings suggest that a newly constituted accountable nursing vocation can instead be considered as de professionalizing

since 1985 the nursing profession has made significant progress in informatics the fifth international

symposium on nursing informatics clearly showed that the nursing profession is well aware of the potential that computer technology holds for improving the quality and efficiency of health care if information systems are well designed integrated and professionally managed the structure of the symposium and the organization of the papers in this volume represent the work of the scientific programme committee and the editors in addition to the scientific papers the editors have also included authors descriptions of panels posters and scientific demonstrations giving readers an excellent overview of the current state of the art of nursing informatics in order to encourage young colleagues to publish graduate students in nursing informatics submitted poster abstracts that are also included in the volume

the international council of nurses commissioned her to write an essay entitled basic principles of nursing care geneva 1960 for the use of nurses who had neither access to technology nor the medical care required to establish disease diagnoses the icn publication is available in 29 languages and is in current use throughout the world noting the absence of an organized literature upon which to base clinical studies she embarked on a project to annotate nursing literature the four volume nursing studies index was completed in 1972 and was hailed as her most important contribution to nursing science miss henderson started her most important writing project at the age of 75 when she began the sixth edition of the principles and practice of nursing text over the next five years she led gladys nite and seventeen contributors to synthesize the professional literature she had just completed indexing with the wisdom gleaned from over fifty years in the nursing profession and the opportunity to review the writings of all principle authors who wrote in english she fashioned a work that both thoroughly criticized health care and offered nurses an opportunity to correct the shortcomings the book operates on two levels individual and global she argued that health care will be reformed by the individual nurses who will enable their patients to be independent in health care matters when patients are both educated and encouraged to care for themselves she took this philosophy to new heights by eliminating medical jargon from the text and
