in the past 20 years meditation has grown enormously in popularity across the world practised both by the general public as well as by an increasing number of psychologists within their daily clinical practice meditation is now used to treat a range of disorders including depression anxiety eating disorders chronic pain and addiction in the past twenty years we have also learned much more about the underlying neural bases for meditation and why it works the psychology of meditation research and practice explores the practice of meditation and mindfulness and presents accounts of the cognitive and emotional processes elicited during meditation practice written by researchers and practitioners with considerable experience in meditation practice and from different religious or philosophical perspectives he book examines the evidence for the effects of meditation on emotional and physical well being in therapeutic contexts and in applied settings the areas covered include addictions pain management psychotherapy physical health neuroscience and the application of meditation in school and workplace settings uniquely the contributors also present accounts of their own personal experience of meditation practice including their history of practice phenomenology and the impact it has had on their lives drawing on evidence from both research and practice this is a valuable synthesis of the ways in which meditation can profoundly enrich human experience

it is an unfortunate reality that many employees experience elevated levels of stress at work feeling stressed has impacts beyond mere emotions for example a survey of european union member states found that 28 of employees reported stress related illness or health issues and studies in the usa have found that over 25 of employees reported that they are often or very often burned out by their work also not all stress should be or can be eliminated as many industries and jobs are highly demanding in their nature therefore it is important that employees employers clinicians and researchers endeavor to develop a better understanding of workplace stressors and how employee health and well being can be improved this book can help individuals and organizations better appreciate stressors faced by employees it showcases research by over two dozen authors in twelve chapters focusing on the interpersonal and occupation based sources of workplace stress as well as how to alleviate work stress coworkers supervisors and others with whom a person works can have a dramatic influence on the degree of stress a worker experiences and it is often the interpersonal conflict that is unrelated to one s job that is the most difficult to manage in addition the context of a person s work also influences the degree and type of stressors they encounter at work and this book examines several occupations and their associated stress we hope that these findings provide ways

for individuals and organizations to enhance the well being of employees

this volume covers stereotactic principles and functional stereotaxis amongst the stereotactic principles are discussions of frame based and frameless systems of stereotaxis image guidance stereotaxis atlases and the technical aspects of radiosurgery within functional neurosurgery disorders covered include the diagnosis and management of pain epilepsy movement disorders and the rediscovered field of surgery for psychiatric disorders

end of life issues including fear of dying have been recognized as a factor hindering psychosocial functioning in elderly populations as people age many focus with increasing intensity on the issues they face as elderly members of society and as people facing end of life decision making the inevitability of death does not detract from the onset of death anxiety an emerging strategy is the use

of existential philosophical principles in the creation of an operational psychoanalytic praxis because end of life issues often result in the desire by individuals to confront their existence existential philosophy the application of an existential psychotherapeutic approach has been introduced as a part of existing research this has led to the identification of death fear as a major development in the presence of end of life assessments an operational psychoanalytic model that addresses the issue of the fear of death is a major development the underlying belief shared by researchers is that fear is inherent for both doctors and patients and requires understanding and compassion on both sides of the equation this research study is designed to assess the models or psychoanalytical praxes introduced when addressing the needs of elderly individuals and to evaluate both the historical context in which they were formed and the support mechanisms for their continuation

the 7 volume set Incs 14487 14493 constitutes the proceedings of the 23rd international conference on algorithms and architectures for parallel processing ica3pp 2023 which took place in tianjin china during october 2023 the 145 full papers included in this book were carefully reviewed and selected from 439 submissions ica3pp covers the many dimensions of parallel algorithms and architectures encompassing fundamental theoretical approaches practical experimental projects and commercial components and systems

cultural traditions do adversely affect the education of many people in the world women are unfortunately the most affected victims of their culture this book demonstrates how cultural traditions can militate against the education of women in zambia with a focus on the tumbuka tribe the evidence at hand demonstrates that patrilineal groupings are strongholds of the patriarchal predisposition and patriarchal attitudes and cultural traditions do not recognize women as equal partners with men the tumbuka women s experiences and beliefs reflect socio cultural traditional norms that tend to limit gender equality and compel women to accept and justify male domination at the expense of their own status and to regard consequent inequalities as normal evidence demonstrates that the initiation rites an active institution for girls of pubescent age interfere more with the school based education of girls the women are active social agents as well as passive learners who will not allow the girls they are coaching to question the purpose for some traditional practices that are oppressive and directly cause them to fail to complete their schooling successfully

this comprehensive resource provides a one stop information repository exploring all psychological aspects of covid 19 it documents the after effects of the covid pandemic and how it transformed india as a society and its citizens as

individuals the book covers the psycho social impact on society and individuals and our collective behaviour as well as coping strategies and interventions and how lessons learned will help in preparedness for the future including case studies and the latest research this book examines how psycho social paradigms changed as a result of the pandemic and left their watermark on the human psyche it also explores the coping strategies adopted to deal with this common aggressor and how the techniques varied in accordance with social cultural and geographical factors the final chapters offer new insights for the future highlighting the psychological infrastructure required the type of preparedness and handling strategies necessary to mitigate the impact of any future biogenic pandemics combining theory and practical application it will be valuable reading for academics and researchers as well as practising psychologists clinical psychologists and law makers who are concerned with mental health
