a provocative study that reconsiders our notion of play and how its deceptively wholesome image has harmed and erased people of color contemporary theorists present play as something wholly constructive and positive but this broken definition is drawn from a white european philosophical tradition that ignores the fact that play can and often does hurt in fact this narrow understanding of play has been complicit in the systemic erasure of black indigenous and people of color bipoc from the domain of leisure in this book aaron trammell proposes a corrective a radical reconsideration of play that expands its definition to include bipoc suffering subjugation and taboo topics such as torture as he challenges and decolonizes white european thought trammell maps possible ways to reconcile existing theories with the fact that play is often hurtful and toxic trammell upends current notions by exploring play s function as a tool in the subjugation of bipoc as he shows the phenomenology of play is a power relationship even in innocent play human beings subtly discipline each other to remain within unspoken rules going further trammell departs from mainstream theory to insist that torture can be play approaching it as such reveals play s role in subjugating people in general and renders visible the long ignored experiences of bipoc such an inclusive definition of play becomes a form of intellectual reparation correcting the notion that play must give pleasure while also recasting play in a form that focuses on the deep painful and sometimes traumatic depths of living

out of hiding extremist white supremacy and how it can be stopped explains how white supremacist extremism endures the varied forms it takes its relationship with systemic racism and what to do about it the book draws on more than 30 years of extensive data and direct experiences with extremists to describe how white supremacy moved into the spotlight during the first two decades of the 21st century the argument focuses on three moments between 2008 and today during which white supremacists took opportunities to move from pockets of underground activism to violent protests across the united states the authors offer a corrective to observers who mischaracterize today s racial extremism as a new form of alt right conservatism or white nationalism emanating from an isolated poorly educated and economically disenfranchised online fringe these misunderstandings reflect the limited attention given to the varied and persistent forms of racial extremism that have long simmered in america and an inability to acknowledge the appeal white supremacist messages can hold for a broad swath of the u s population this volume contributes a longer view than other books to demonstrate that today s white supremacy is less a unique eruption than a continuation and an acceleration of longstanding u s white supremacy this is essential reading for scholars and activists interested in racism white supremacy and far right extremism

fragments of trauma and the social production of suffering trauma history and memory offers a kaleidoscope of perspectives that highlight the

problem of traumatic memory because trauma fragments memory storytelling is impeded by what is unknowable and what is unspeakable each of the contributors tackles the problem of narrativizing memory that is constructed from fragments that have been passed along the generations when trauma is cultural as well as personal it becomes even more invisible as each generation's attempts at coping push the pain further below the surface consequently that pain becomes increasingly ineffable haunting succeeding generations in each story the contributors offer there emerges the theme of difference a difference that turns back on itself and makes an accusation themes of knowing and unknowing show the terrible toll that trauma takes when there is no one with whom the trauma can be acknowledged and worked through in the face of utter lack of recognition what might be known together becomes hidden our failure to speak to these unspoken truths becomes a betrayal of self and also of others in the case of intergenerational and cultural trauma we betray not only our ancestors but also the future generations to come in the face of unacknowledged trauma this book reveals that we are confronted with the perennial choice of speaking or becoming complicit in our silence
