this book presents a series of pedagogical experiments translating climate science environmental humanities material research ecological practices into the architectural curriculum balancing the science and humanities it exposes recent pedagogical experiments from renown educators while also interrogating a designer's agency between science and speculation in the face of climate uncertainty the teaching experiments are presented across four sections abstraction organization building and narrative exposing core parts of an architect's education and how educators can simultaneously provide fundamental skills and constructive literacy while instigating environmental sensibilities chapters cover issues such as an unstable hydrosphere water infrastructure remediating materials methods of disassembly and adaptive reuse as well as constructing new aesthetic categories of climate change and implementing oral histories of construction among many others written and edited by expert design educators actively engaged in experimenting in new forms of pedagogy this book will be of great use to architecture instructors at all levels looking to renew their teaching practices to more directly address the climate emergency it will also appeal to those academics across the built environment interested in the ways design can affect and adapt to climate change

political factors influence judicial decisions arguments and input from lawyers and interest groups shifting public opinion and the ideological and behavioral inclinations of the justices collectively influence the development of constitutional doctrine in constitutional law for a changing america bestselling authors lee epstein kevin t mcguire and thomas g walker draw on both political science and legal studies to analyze and excerpt cases accounting for recent landmark court decisions including key opinions handed down through the 2020 term updated with additional material such as recent court rulings more than 500 supplemental cases and greater coverage of freedom of expression this eleventh edition will develop students understanding of how the u s constitution protects civil rights and liberties included with this text the online resources for your text are available via the password protected instructor resource site

the forms by which a deceased person may be brought to rest are as many as there are causes of death in most societies the disposal of the corpse is accompanied by some form of celebration or ritual which may range from a simple act of deportment in solitude to the engagement of large masses of people in laborious and creative festivities in a funerary context the term ritual may be taken to represent a process that incorporates all the actions performed and thoughts expressed in connection with a dying and dead person from the preparatory pre death

stages to the final deposition of the corpse and the post mortem stages of grief and commemoration the contributions presented here are focused not on the examination of different funerary practices their function and meaning but on the changes of such rituals how and when they occurred and how they may be explained based on case studies from a range of geographical regions and from different prehistoric and historical periods a range of key themes are examined concerning belief and ritual body and deposition place performance and commemoration exploring a complex web of practices

a leader s role in the management of change is a critical issue for successful outcomes of strategic initiatives globalization and economic instability have prompted an increase in organizational changes related to downsizing and restructuring in order to improve financial performance and organizational competitiveness researchers agree that a leader s inability to fully understand what is needed in order to guide their organization through successful change can be a reason for failure proper planning and management of change can reduce the likelihood of failure promote change effectiveness and increase employee engagement yet change in organizations must be viewed as a continuous activity that affects both organizational and individual outcomes if change management can be considered as an event induced by socio cultural factors the cultural variable gains greater significance when applied to the quality of the relationship between a leader and their team many organizations

today are on the verge of internationalization it is here that the cultural context can affect behaviors and in the same way leadership style the research presented in this book by an eminent group of scholars explores the influence of culture ethnic regional religious on how leaders manage change within organizations

provides unique synthesis of various modeling methodologies used to aid planning and operational decision making for academic researchers and professionals

this book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change eleven case studies analyze in depth impacts of extreme events in projects basins and regions in the arid americas unites states and mexico australia brazil china egypt france nepal mexico pakistan turkey and south africa they discuss the importance of infrastructure mainly reservoirs in adaptation strategies how planning and management aspects should improve in response to changing climatic economic social and environmental situations and what the management institutional and financial challenges would be for their implementation governance aspects policies institutions and decision making and technical and knowledge limitations are a substantial part of the analyses the case studies argue that reservoirs are essential to build resilience contributing to adaptation to climate variability and change however that for them to be effective they need to be planned and managed within a governance framework that considers long term perspectives and multi sector and multi level actor needs and perspectives
