the book is a textbook in regional economics for undergraduate and graduate students a vast amount of theories and models have been developed since the official recognition of regional economics as a distinct branch of economics in particular this book focuses on logical and theoretical linkages between different theories and models both macro and microeconomic neoclassical and keynesian the evolution of theoretical approaches in regional economics is dealt in the book through the evolution of the concept of space from physical space which characterizes location theory to uniform space typical of neoclassical and keynesian approaches to diversified relational space embedded in local districts and milieu approaches as well as in the theory of learning regions to diversified stylised space as exemplified by the new economic geography and dynamic neoclassical approaches

charlie karlsson börje johansson and roger r stough have collected a set of important articles on some of the most important factors determining the growth of contemporary regional economics the focus of the book is on important growth determinants that are almost never mentioned in the standard analyses of economic growth entrepreneurship is discussed from theoretical as well as empirical points of view the role of social capital as well as institutional governance are highlighted in chapters that ought to be read by all economists interested in the economic growth and development of regions Åke e andersson jönköping international business school jönköping sweden this is an exceptional work that is the result of an outstanding selection of the best papers on agglomeration and innovation given at the 10th anniversary of the udevalla conference it is the finest set of conference papers i have seen in the past 25 years these are artfully woven together into three primary areas the first focuses on the role of knowledge and innovation in entrepreneurship the second incorporates the institutional environment while the third looks at the international context i recommend this collection to academics students and all who are interested in the role of creativity and innovation in entrepreneurial development not only are these the very best researchers in the field but the materials are presented in a clear and concise manner making it an outstanding base for advanced courses in this area this work combines some of the best writings by top notch authors sharing the sharpest insight into the complex area of the role of human capital in structuring agglomerative

advantages i take my hat off to the fine editorial work represented in this volume kingsley e haynes george mason university us the book provides a remarkable contribution on the role of human capital as major creator of knowledge interpreted as abilities capabilities methods creativity and persistency in identifying and solving problems by collecting selecting interpreting and applying existing knowledge and information the laws of increasing returns to human capital among which are urban agglomerations as magnets which attract persons who embody knowledge are conceptually searched and empirically verified the book answers questions such as why do highly educated people i e the carriers of human capital tend to concentrate in large agglomerations what are the agglomerative forces and how does this agglomeration of human capital impact different types of economic activities and in particular their location behaviour important normative implications are thus derived from such a collected effort roberta capello politecnico di milano italy the regional economics of knowledge and talent edited by charlie karlsson börje johansson and roger r stough brings together a wide range of cutting edge studies and research on the role of talent in regional development it is an important addition to our understanding of how knowledge human capital and talent shape the development of cities and regions across the globe richard florida university of toronto canada this original and instructive new book defines and explores the concept of knowledge as the talent skills know how and understanding embodied in individuals the distinguished contributors advance the current research frontier in three novel directions which focus on the role of human capital and talent for creativity entrepreneurship and regional development the role of institutions for the behaviour of firms and entrepreneurs and the influence of the global context on the location export and innovation behaviour of firms in a knowledge economy they also address critical questions that underpin the emerging knowledge economy why does human capital and talent tend to agglomerate in large urban regions how does this agglomeration affect the location of different types of economic activities how does this agglomeration affect regional growth presenting the state of the art in the field of knowledge economics this book will prove a stimulating and challenging read for scholars and researchers with an interest in economics business and management and regional and urban studies

this new and up to date text explains those aspects of economics most relevant to understanding contemporary issues facing the regional economy in the second half of the 1990s the region is considered in the context of the subregional and local urban economies and also in relation to the wider national and supranational economic framework the influence of the european community is given particular consideration the components of the regional economy and their impact on regional growth potential are explained the practical relevance of the theory is illustrated through appropriate regional examples regional and urban policies of the 1980s and 1990s are covered policy objectives and instruments are studied and policy is appraised in light of its contribution and limitations policy is placed in the context of both the european community and national and local government authorities

regional economics fundamental concepts policies and institutions is a unique and unconventional economics textbook which emphasizes the role of space in economics and highlights the importance of non economic factors particularly the role of institutions in regional development it also presents the approach on how to evaluate regional development performance based on economic social and environmental considerations which is the organizing principle for meeting people oriented development and sustainable development goals other essential concepts such as regional science and spatial economics are also explored in this book why activities tend to be spatially concentrated and can get more intensified despite efforts to disperse them toward other regions why infrastructure development intended to increase activities and improve the population s welfare can produce the opposite outcome of greater interregional inequality what is the role of regional and national policies in affecting growth incentives and how non economic factors such as institutions and the quality of local leaders can make a difference in welfare achievement addressing these questions allows readers to better understand the various phenomena in the actual development process

the subject area regional economics has become topical this means that in economic analyses the production factor space is of increasing importance this study book aims to integrate space in the area of general economics in an analytical way models and their applications play a major role in the book s approach the subject of regional economics contains two broad fields the first is

the theory of location including the basic principles of the economic theory of land use which has a microeconomic character the second subject is regional economic development including spatial equilibrium theory which is mainly macroeconomic in nature in the book both fields will be elaborated in detail basic principles of economics are included as background information in order to study the more advanced subjects addressed in the book another important feature of the book is its european character which is rather unique in fact the majority of the applications here are from europe regional statistical data and maps available in eurostat have been used the spreadsheet programme excel is used as a convenient tool for the computation of model results the description of major applications of excel is included in the book which makes it self contained

compilation of essays on government policy and regional planning concerning developing areas in the usa covers such topics as industrial development industrial policy for both urban areas and rural areas surplus labour supply areas urbanization the employment opportunity promotion effects of new plants location location of industry capital flows problems of rural poverty in southern states etc and includes large scale models for forecasting regional economic activity and descriptions of econometrics research methods

originally published in 1977 this book provides the first concise non technical account of what the main kinds of regional problems are how they arise and the kinds of policy which have been used to tackle them in the uk usa and western europe the book starts with a discussion of why regional problems really are situations which call for special action followed by a short preliminary classification of problem regions including those in the less developed countries then on to a more detailed survey of the origins and experience of selected problem regions in the more developed market economies the authors focus on four broad kinds of problem region agricultural regions coal mining regions old textile regions and so called congested regions they conclude with a selective survey of regional policies in these more advanced economies distinguishing and comparing the main trends and the different national styles

the world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions there are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output in order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through keynesian to marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms the way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained the book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

originally published in 1988 leading international researchers in regional economic development have contributed an integrated set of chapters reviewing the whole field and taking stock of current thinking the book is in honour of françois perroux the father of regional development theory whose contributions to two important concepts in economics time and space have been substantial the book comprises five parts part one covers perroux s work in general and on growth poles in particular part two deals with the politics of place population and regional development techniques for regional policy analysis and a neoclassical approach to regional economics in part three the canadian scene is reviewed at national and regional levels in part four chapters on urban development small and medium size cities and capital grants deal with the experiences of other countries part five concludes the book with a chapter on growth poles optimal size of cities and regional disparities and government intervention

originally published in 1986 this book is concerned with how regional economies adapt and respond to changing circumstances and especially with the spatial system and processes of restructuring throughout the book there is a methodological commitment to

adjustment theory a unique analytical framework for the study of the dynamics of advanced capitalist economies instead of homogenising space in the manner of neoclassical economic theory the authors focus on adjustment processes that produce and reproduce spatial differentiation the most important facets of regional economic structure are covered employment wages prices migration and capital investment in terms of their own dimensions and their connections with the larger theoretical framework each part of the book develops one particular dimension of regional adjustment and each has an overview and summary within each part there is a sequence of related studies focussing on the empirical aspects theoretical logic and distributive consequences of regional adjustment
