hundreds of exceptional cartographic images are scattered throughout medieval and early modern arabic persian and turkish manuscript collections the plethora of copies created around the islamic world over the course of eight centuries testifies to the enduring importance of these medieval visions for the muslim cartographic imagination with medieval islamic maps historian karen c pinto brings us the first in depth exploration of medieval islamic cartography from the mid tenth to the nineteenth century pinto focuses on the distinct tradition of maps known collectively as the book of roads and kingdoms kitab al masalik wa al mamalik or kmms examining them from three distinct angles iconography context and patronage she untangles the history of the kmms maps traces their inception and evolution and analyzes them to reveal the identities of their creators painters and patrons as well as the vivid realities of the social and physical world they depicted in doing so pinto develops innovative techniques for approaching the visual record of islamic history explores how medieval muslims perceived themselves and their world and brings middle eastern maps into the forefront of the study of the history of cartography

about a millennium ago in cairo an unknown author completed a large and richly illustrated book in the course of thirty five chapters this book guided the reader on a journey from the outermost cosmos and planets to earth and its lands islands features and inhabitants this treatise known as the book of curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 lost maps of the caliphs provides the first general overview of the book of curiosities and the unique insight it offers into medieval islamic thought opening with an account of the remarkable discovery of the manuscript and its purchase by the bodleian library the authors use the book of curiosities to re evaluate the development of astrology geography and cartography in the first four centuries of islam their account assesses the transmission of late antique geography to the islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval islamic plans of towns and ports early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on earth lost maps of the caliphs also reconsiders the history of global communication networks at the turn of the previous millennium it shows the fatimid empire and its capital cairo as a global maritime power with tentacles spanning from the eastern mediterranean to the indus valley and the east african coast as lost

maps of the caliphs makes clear not only is the book of curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of islamic civilization that opens an unexpected window to the medieval islamic view of the world

as the manuscript treasures in the libraries of timbuktu and throughout the northwestern quarter of africa become known many questions are raised how did a manuscript culture flourish in the sahara and in muslim africa more generally under what conditions did african intellectuals thrive and how did they acquire scholarly works and the writing paper necessary to contribute to knowledge by exploring the history of the trans saharan book and paper trades the scholarly production and teaching curriculae of african muslims and the formation preservation and codicology of library collections the authors of this original volume provide a variety of answers the select number of invited contributions represents current research in the material technological economic and cultural dimensions of manuscript production circulation and preservation and the development of specific scholarly and intellectual traditions in saharan and sudanic africa

a companion to mediterranean history presents a wide ranging overview of this vibrant field of historical research drawing together scholars from a range of disciplines to discuss the development of the region from neolithic times to the present provides a valuable introduction to current debates on mediterranean history and helps define the field for a new generation covers developments in the mediterranean world from neolithic times to the modern era enables fruitful dialogue among a wide range of disciplines including history archaeology art literature and anthropology

in scope this book matches the history of cartography vol 1 1987 edited by brian harley and david woodward now twenty years after the appearance of that seminal work classicists and medievalists from europe and north america highlight distill and reflect on the remarkably productive progress made since in many different areas of the study of maps the interaction between experts on antiquity and on the middle ages evident in the thirteen contributions offers a guide to the future and illustrates close relationships in the evolving practice of cartography over the first millennium and a half of the christian era contributors are emily albu raymond clemens lucy donkin evelyn edson tom elliott patrick gauthier dalché benjamin kedar

maja kominko natalia lozovsky yossef rapoport emilie savage smith camille serchuk richard talbert and jennifer trimble
