become dominant in one language over others Yes language dominance can shift based on environmental factors and language use However proficiency in other languages is not necessarily lost it may simply become less readily accessible 4 5 How can educators support multilingual students effectively Educators can support multilingual students by valuing all their languages incorporating their native language into instruction when appropriate encouraging codeswitching in appropriate settings and providing opportunities for language use and development across different contexts Understanding the dynamic nature of multilingualism is key to creating truly inclusive and effective learning environments
