this book introduces the reader to the ideas and the personality of a scholar who exerted a major influence on the course of art historical studies through his publications through the institute which bears his name and through his disciples who include some of the most eminent people in the field

the work of german cultural theorist and art historian aby warburg 1866 1929 has had a lasting effect on how we think about images this book is the first in english to focus on his last project the encyclopedic atlas of images mnemosyne begun in earnest in 1927 and left unfinished at the time of warburg s death in 1929 the atlas consisted of sixty three large wooden panels covered with black cloth on these panels warburg carefully intuitively arranged some thousand black and white photographs of classical and renaissance art objects as well as of astrological and

astronomical images ranging from ancient babylon to weimar germany here and there he also included maps manuscript pages and contemporary images taken from newspapers trying through these constellations of images to make visible the many polarities that fueled antiquity's afterlife warburg envisioned the atlas as a vital form of metaphoric thought while the nondiscursive frequently digressive character of the atlas complicates any linear narrative of its themes and contents christopher d johnson traces several thematic sequences in the panels by drawing on warburg's published and unpublished writings and by attending to warburg's cardinal idea that pathos formulas structure the west's cultural memory johnson maps numerous tensions between word and image in the atlas in addition to examining the work itself he considers the literary philosophical and intellectual historical implications of the atlas as johnson demonstrates the atlas is not simply the culmination of warburg's lifelong study of renaissance culture but the ultimate expression of his now literal now metaphoric search for syncretic solutions to the urgent problems posed by the history of art and culture

a compelling analysis of the work of art historian aby warburg and its radical implications for the study of visual images aby warburg 1866 1929 is best known as the originator of the discipline of iconology and as the founder of the institute that bears his name his followers included some of the celebrated art historians of the twentieth century such as erwin panofsky edgar wind and fritz saxl but his heirs developed for the most part a domesticated iconology based on the decipherment and interpretation of symbolic material as philippe alain michaud demonstrates in this important book warburg's project was remote from any positivist or neo kantian ambitions nourished on the work of friedrich nietzsche and jacob burckhardt warburg fashioned a critical iconology to reveal the irrationality of the image in western culture opposing the grand teleological narratives of art inaugurated by giorgio vasari warburg's method operated through historical anachronisms and discontinuities using procedures of montage collision he brought together pagan artifacts with masterpieces of florentine renaissance art the astrology of the ancient near east with the lutheran reformation mannerist festivals with the sacred dances of native americans michaud insists that for warburg the practice of art history was not only the recognition of the radical heterogeneity of objects but the discovery within the art work itself of lines of fracture contradictions tensions and the energies of magic empathy totemism and animism michaud provides us with a book that not only is about warburg but also extends his intuitions and discoveries into analyses of other categories of imagery like the daguerreotype the chronophotography of Étienne jules marey early cinema and the dances of loïe fuller this edition also includes a foreword by georges didi huberman and texts by warburg not previously translated into english chosen as one of the best art books of 2004 by the washington post and bookforum

a landmark study on aby warburg's life and work translated into english in aby warburg and anti semitism charlotte schoell glass provides an unprecedented look at the life and writings of cultural critic aby warburg through the prism of warburg's little known political views schoell glass argues provocatively based on archival research that warburg's work and teachings developed as a reaction to the growing anti semitism in germany which he saw as a threat to classical education and university scholarship translated into english for the first time aby warburg and anti semitism sheds much needed light on warburg's views on judaism and the politics of his time aby warburg scion of a well known jewish banking family in hamburg sacrificed his birthright to pursue a career as a private scholar as an independent art historian he devoted himself almost exclusively to reinterpreting the revival of antiquity within the renaissance urging other art historians to approach their work as a branch of the larger study of image making and philosophy in this study schoell glass examines warburg's most influential essays on dürer rembrandt and the sassetti chapel and his most innovative concepts the accessories of motion the pathos formula and the afterlife of antiquity to illustrate how warburg persistently showed a deep concern over a disappointing and unstable outside world within his

own work schoell glass shows how warburg attempts to make a response to anti semitism the only way he knew how despite his awareness of the diminishing societal relevance of that response from this study of warburg schoell glass produces a multilayered case study of the encounter between twentieth century politics and scholarship art historians german historians and scholars of jewish studies and cultural studies will be grateful for this volume

justin j white explores the nature of images in ancient israel through a reconceptualization of the relationship between image and text he proposes that in ancient israel texts evoked images as a core part of their rhetoric rather than conceptualizing texts and images as ontologically or functionally distinct media he argues that both media are mixed media even while neither medium is reducible to the other in order to make this argument he focuses on the visual aspects of textual rhetoric what he terms the poetics of visibility he builds his argument across three text specific axes of visual rhetoric ekphrasis the visual imagination and material agency he makes the claim that each of these three axes are endemic to israelite literature and mutually contribute to the formation of a robust ontology of visual representation in ancient israel
