this book focuses on how to improve equal and public participation in a range of innovative citizen forums that could revitalize democracy around the world

in this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity deliberative democracy and the plural polity provides a realistic but critical reform agenda that can animate struggles for justice in an enormously diverse world

drawing on political legal national post national as well as american and european perspectives this collection of essays offers a diverse and balanced discussion of the current arguments concerning deliberative democracy its contributions focus on discontent provide a critical assessment of the benefits of deliberation and also respond to the strongest criticisms of the idea of democratic deliberation the essays consider the three basic questions of why how and where to deliberate democratically this book will be of value not only to political and democratic theorists but also to legal philosophers and constitutional theorists and all those interested in the legitimacy of decision making in national and post national pluralistic polities

democracies are struggling to respond to the climate crisis one promising approach to the ecological transition is based on innovations involving panels of citizens drawn at random many countries have experimented with this form of deliberative democracy at national and local levels these citizens assemblies formulate public policy proposals the french citizens convention for climate is the largest in terms of size duration and mandate thanks to a multi disciplinary field survey involving around twenty researchers this book provides an understanding of the complexity of this experience from several angles procedures and processes the identity and roles of its members relationships with expertise and representatives evaluation and comparison with other cases deliberative democracy and ecological transition plays an important role in reflecting on an original practice of

democratic innovation and its potential for fair governance of climate policies

in this important collection of writings leading legal and political thinkers address a wide array of issues that confront societies undergoing a transition to democratic rule bridging the gap between theory and practice in international human rights law and policy the contributors continue discussions that were begun with the late argentine philosopher lawyer carlos santiago nino then extend those conversations in new directions inspired by their own and nino's work the book focuses on some of the key questions that confront the international human rights movement today what is the moral justification for the concept and content of universal human rights what is the relationship among nation building constitutionalism and democracy what are the political implications for a conception of universal human rights what is the relationship between moral principles and political practice how should a society confront what kant called radical evil and how does a successor regime justly and practically hold a prior regime accountable for gross violations of human rights

deliberative democracy is increasingly central in democratic theory and its concepts are employed in a growing number of fields including social movement studies and environmental politics at the same time contemporary citizen activism seems to feature some forms of engagement that resonate with deliberative democratic ideas this book provides an in depth investigation of the qualities of citizens engagement from a deliberative democratic standpoint the key concept through which such qualities are investigated is deliberative capacity the extent to which organisations host authentic inclusive and consequential discursive processes this book is based on a comparative study of four grassroots local initiatives two from australia in tasmania and queensland and two from italy in emilia romagna and sicily by offering a critical assessment of deliberation in social movement organisations this study identifies key aspects affecting their ability to pursue democratic deliberation and sheds new light on the role of community actors in deliberative democracy

the past few years have seen a remarkable ferment in the theory of democracy deliberative democracy and beyond is a critical tour through recent democratic theory by one of the leading political theorist in the field it examines the deliberative turn in democratic theory which argued that the essence of democratic legitimacy is to be found in authentic deliberations on the part of those affected by a collective decision the deliberative turn began as a challenge to established institutions and models of democracy but it has now been

largely assimilated by these same institutions and models drawing a distinction between liberal constitutionalist deliberative democracy and discursive democracy the author criticizes the former and advocates the latter he argues that a defensible theory of democracy should be critical of established power pluralistic reflexive in its questioning orientation to established traditions transnational in its capacity to extend across state boundaries ecological and dynamic in its openness to ever changing constraints upon and opportunities for democratization dryzek s reinvigorated approach enables deliberative democracy to respond more effectively to the criticisms that have been leveled against it oxford political theory presents the best new work in contemporary political theory it is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory the series will contain works of outstanding quality with no restrictions as to approach subject matter series editors will kymlicka david miller and alan ryan

contemporary democracies are frequently criticized for failing to respond adequately to environmental problems and our political institutions are often charged with misrepresenting environmental values in decision making processes in this innovative volume graham smith argues that the enhancement and institutionalisation of democratic deliberation will improve reflection on the wide range of environmental values that citizens hold drawing on theories of deliberative democracy smith argues that institutions need to be restructured in order to promote democratic dialogue and reflection on the plurality of environmental values deliberative democracy and the environment makes an important contribution to our understanding of the relationship between democratic and green political theory drawing on evidence from europe and the united states it systematically engages with questions of institutional design

the banner of deliberative democracy is attracting increasing numbers of supporters in both the world s older and newer democracies this effort to renew democratic politics is widely seen as a reaction to the dominance of liberal constitutionalism but many questions surround this new project what does deliberative democracy stand for what difference would deliberative practices make in the real world of political conflict and public policy design what is the relationship between deliberative politics and liberal constitutional arrangements the 1996 publication of amy gutmann and dennis f thompsons democracy and

disagreement was a signal contribution to the ongoing debate over the role of moral deliberation in democratic politics in deliberative politics an all star cast of political legal and moral commentators seek to criticize extend or provide alternatives to gutmann and thompson s hopeful model of democratic deliberation the essays discuss the value and limits of moral deliberation in politics and take up practical policy issues such as abortion affirmative action and health care reform among the impressive roster of contributors are norman daniels stanley fish william a galston jane mansbridge cass r sunstein michael walzer and iris marion young and the editor of the volume stephen macedo the book concludes with a thoughtful response from gutmann and thompson to their esteemed critics this fine collection is essential reading for anyone who takes seriously the call for a more deliberative politics

in a world where the impact of internal conflicts is spreading ever wider there is a real need to rethink how democratic ideals and institutions can best be implemented this book responds to this challenge by showing that deliberative democracy has crucial but largely untapped normative implications for societies deeply divided along ethnic lines its central claim is that deliberative norms and procedures can enable the citizens of such societies to build and sustain a stronger sense of common national identity more specifically it argues that the deliberative requirements of reciprocity and publicity can enable citizens and representatives to strike an appropriate balance between the need to recognise competing ethnic identities and the need to develop a common civic identity centred on the institutions of the state although the book is primarily normative it supports its claims with a broad range of empirical examples drawn from cases such as bosnia and herzegovina lebanon macedonia northern ireland and south africa it also considers the normative implications of deliberative democracy for questions of institutional design it argues that power sharing institutions should be conceived in a way that allows citizens as much freedom as possible to shape their own relation to the polity crucially this freedom can enable them to reconstruct their relationship to each other and to the state in ways that ultimately strengthen and sustain the transition from ethnic conflict to democracy

is deliberative democracy the ideal goal of free speech how do social movement organizations activists and political candidates use the media to frame their discourse what responsibilities does the media have in maintaining or promoting democracy in this broadly interdisciplinary volume top scholars in communication political science sociology law and

philosophy offer new perspectives on these and other intersections within democratic discourse and media interweaving elements of social political and communication theory they take on first amendment and legal issues privacy rights media effects and agenda setting publicity multiculturalism gender issues universalism and global culture and the rhetoric of the body among other topics this unique book provides a foundation for evaluating the current state of democratic discourse and will be of interest to students and scholars of deliberative democracy across the social sciences

in deliberative freedom christian f rostbøll accepts the common belief that democracy and freedom are intimately related but he sees this relationship in a new and challenging way rostbøll argues that deliberative democracy is normatively committed to multiple dimensions of freedom and that this in turn makes it a distinct model of democracy he presents a new version of deliberative democracy that rejects the prevailing synthesis of habermasian critical theory and rawlsian political liberalism and contends that this synthesis obscures and neglects important concerns in terms of freedom and emancipation in addition rostbøll explores how the many dimensions of freedom supply a new and fruitful way to address issues such as paternalism elitism rationalism and neutrality

deliberative democracy whereby people debate competing ideas before agreeing upon political action must surely rest on its capacity to include all points of view but how does this inclusive framework engage with activism that occurs outside of and in opposition to deliberative systems themselves activism inclusion and the challenges of deliberative democracy challenges the inherent contradiction of a framework that includes activism but doesn't require sustained exchange with activists instead measuring the value of their efforts in terms of broader deliberative democratic outcomes through the examples of act up

black lives matter and other contemporary activism anna drake explores the systemic oppression that prevents activists from participating in deliberative systems as equals this nuanced study concludes that deliberative democrats must address activism on its own terms external to and separate from deliberative systems that are shaped by injustices only then can activism's distinct democratic contribution be taken seriously
