as attention moves rapidly towards comparative approaches the research and teaching of company law has somehow lagged behind the overall purpose of this book is therefore to fill a gap in the literature by identifying whether conceptual differences between countries exist rather than concentrate on whether the institutional structure of the corporation varies across jurisdictions the objective of this book will be pursued by focusing on specific cases and how different countries might treat each of these cases the book also has a public policy dimension because the

existence or absence of differences may lead to the question of whether formal harmonisation of company law is necessary the book covers 10 legal systems with respect to countries of the european union it focuses on the most populous countries germany france the uk spain italy and poland as well as two smaller member states finland and latvia in addition the laws of two of the world s largest economies the us and japan are included for the purposes of wider comparison all of these jurisdictions are subjected to scrutiny by deploying a comparative case based study on the basis of these case solutions various conclusions are reached some of which challenge established orthodoxies in the field of comparative company law
