the present work is an attempt to analyse critically plato s views on mind and body and more particularly on the mind body relationship within the wider setting of plato s metaphysics we seek to achieve this by a philosophical examination of the dialogues on the basis of a generally accepted order some revision of this order is a by product of our examination strictly speaking soul ought perhaps to be substituted for mind in the above but it seems to be in terms of mind that modern philosophers deal with and refer to the problem that plato tackled mainly in terms of psyche and as it is part of the motivation for dealing with plato s treatment that it is of importance for the modern debate it has been felt necessary to stress the rough identity of the problem in the title of the book and in the introduction in the title of part three and a few other places below this superordinate level we try to keep mind as a translation typically of nous and soul as a translation of psyche

there is an historical element throughout philosophy as edel notes this is always in the

context of problems so emphasis will fall on the major objective of reflective analysis of ideas the major objective of edel s analysis in the theory and practice of philosophy is the fundamental interrelatedness of problems of method metaphysics and value each part is an integral whole complete in itself that philosophy has this central role in human practice indicates that it should be neither discarded nor deified this is the explicit premise of the book students are likely to be faced increasingly with a demand for clarification on the fundamental issues of life and value the expectation that philosophy will provide ready made answers to these kinds of questions is as naive as the demand for any panacea but this task cannot be turned over to any other department of human knowledge or any other branch of social activity by placing emphasis on the importance of theory in matters of practice the need for clear and systematic understanding of the world and man within it and on the constant role of reflection in the management of human affairs edel seeks to shed light on the larger questions of philosophy by examining them in a systematic way the result is a great text and tool for students and teachers that deals directly with the fundamental issues of our civilization
