janet abbate recounts the key players and technologies that allowed the internet to develop but her main focus is always on the social and cultural factors that influenced the internet s design and use since the late 1960s the internet has grown from a single experimental network serving a dozen sites in the united states to a network of networks linking millions of computers worldwide in inventing the internet janet abbate recounts the key players and technologies that allowed the internet to develop but her main focus is always on the social and cultural factors that influenced the internets design and use the story she unfolds is an often twisting tale of collaboration and conflict among a remarkable variety of players including government and military agencies computer scientists in academia and industry graduate students telecommunications companies standards organizations and network users the story starts with the early networking breakthroughs formulated in cold war think tanks and realized in the defense department s creation of the arpanet it ends with the emergence of the internet and its rapid and seemingly chaotic growth abbate looks at how academic and military influences and attitudes shaped both networks how the usual lines between producer and user of a technology were crossed with interesting and unique results and how later users invented their own very successful applications such as electronic mail and the world wide she concludes that such applications continue the trend of decentralized user driven development that has characterized the internet s entire history and that the key to the internet s success has been a commitment to flexibility and diversity both in technical design and in organizational culture

by bringing together leading research that addresses some of the most significant cultural economic and political roles of the internet introduces students to a core set of readings that address this question in specific social and institutional contexts

literature and the internet a guide for students teachers and scholars is the only internet guide written for those who love and study literature the book begins with a practical introduction for readers who want help finding navigating and using literary sites later chapters focus on educational issues such as plagiarism citation website evaluation the use of internet sites in literature courses as well as the technical scholarly and professional issues raised by the advent of the internet finally the book concludes with a chapter on the cultural implications of the internet for literary studies in addition the book offers an annotated bibliography of internet sources with urls that introduces readers to hundreds of sites which they can explore on their own readers need not have a b a or even a major in english and no special training in computer technology and software is necessary the book explains both the basics of the internet and sophisticated scholarly issues in simple language ultimately each internet user must choose his or her own path through the internet but with literature and the internet in hand surfing the net for things literary will be more efficient and satisfying and much less confusing and overwhelming

fay sudweeks and celia romm at the turn of the twenty first century global communication is changing the fabric of society at a rate never experienced before the internet in particular has redrawn the map of global economy to be competitive in today's marketplace companies need to expand commercial activities beyond national borders the global network of electronic infrastructure has played a significant role in this expansion but the technology itself is not the factor driving the business revolution the changes are driven by the interaction of information technology and customer demand customers are not only adapting to new technologies they are demanding more and more global competition electronic commerce therefore is arguably the most important economic trend of our time its presence on the internet in particular is becoming crucial to the effective functioning of organisations especially in a world where companies need to deal with suppliers customers partners and their own units distributed across the world a global business industry created by the internet is no longer a projected vision of technocrats it is a reality the internet is already playing a significant role in determining corporate strategy and in creating values

as internet use is extending to younger children there is an increasing need for research focus on the risks young users are experiencing as well as the opportunities and how they should cope with expert contributions from diverse disciplines and a uniquely cross national breadth this timely book examines the prospect of enhanced opportunities for learning creativity and

communication set against the fear of cyberbullying pornography and invaded privacy by both strangers and peers based on an impressive in depth survey of 25 000 children carried out by the eu kids online network it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype it argues that in the main children are gaining the digital skills coping strategies and social support they need to navigate this fast changing terrain but it also identifies the struggles they encounter pinpointing those for whom harm can follow from risky online encounters each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government industry or child welfare who are working to enhance children s digital experiences

the internet has become an indispensable tool for communications research and commerce but this report addresses the growing public concern at the internet s dark side the easy availability of hardcore pornography which people may find offensive the uploading by ordinary people of film of real fights bullying or alleged rape or the setting up of websites encouraging others to follow extreme diets or self harm or even commit suicide in particular there is increasing anxiety among parents about the use of social networking sites and chatrooms for grooming and sexual predation the committee welcomes the government commissioned report by dr tanya byron on the risks posed by the internet to children and agrees that a uk council for child internet safety should be established sites which host user generated content typically photos and videos uploaded by members of the public have taken some steps to set minimum standards for that content the committee recommends that proactive review of content should be standard practice for such sites and calls for provision of high profile facilities for reporting abuse or unwelcome behaviour directly to law enforcement and support organisations there is a distinct issue about labelling of video games to indicate the nature of their content two systems currently exist side by side the industry awards its own ratings and the british board of film classification awards classifications to a small number of games which feature content unsuitable for children the dual system is confusing and bbfc should have responsibility for rating games with content appropriate for adults or teenagers

how does the most important technology of our time the internet and www work the authors explain in simple language and

in short the individual technical building blocks and organizational structures behind the greatest innovation of our time only those who know how the technologies that determine our everyday lives can deal with them confidently and in sovereignty although digitalization is shaping our daily lives the technologies behind the internet and www remain obscure to most people this book provides the key to understanding the huge developments of our time

chronicles the internet explosion explaining communication protocols the world wide wireless computing e commerce security based radio and television and such online services as e mail newsgroups and chat groups
