forty years of energy incompetence villains failures of leadership and missed opportunities americans take for granted that when we flip a switch the light will go on when we turn up the thermostat the room will get warm and when we pull up to the pump gas will be plentiful and relatively cheap in the end of energy michael graetz shows us that we have been living an energy delusion for forty years until the 1970s we produced domestically all the oil we needed to run our power plants heat our homes and fuel our cars since then we have had to import most of the oil we use much of it from the middle east and we rely on an even dirtier fuel coal to produce half of our electricity graetz describes more than forty years of energy policy incompetence and argues that we must make better decisions for our energy future despite thousands of pages of energy legislation since the 1970s passed by a congress that tended to elevate narrow parochial interests over our national goals americans have never been asked to pay a price that reflects the real cost of the energy they consume until americans face the facts about price our energy incompetence will continue and along with it the unraveling of our environment security and independence
