this masterful account situates e m cioran in his rightful place as one of the key figures in french post war thought acknowledged for decades as a pillar of european culture the romanian émigré to paris has been overlooked by anglophone scholarship but by placing him in conversation with acclaimed mainstream thinkers like martha nussbaum hannah arendt and samuel beckett this book finally redresses that balance cioran is a thinker

determined to peel back the layers of polite philosophy to explore the anxious and difficult experience of being human. Emil Cioran and the human condition focuses in on the iconoclastic force of his work and in particular his preoccupation with birth which he conceives of as the source of life's dilemmas framing its discussions with enduring theological themes like guilt, original sin, salvation and apocalypse. This book brings the true value of Cioran's work for western thought to the fore. These ideas often go unnoticed in the work of more conventional thinkers making Cioran an essential figure in confronting the apocalyptic nature of our own age. The unique combination of pessimism, dark humour and morbid wit in Cioran's writing pushes us to explore what if any future there is for humanity in a world becoming ever more inhuman. This is a lively and thought provoking introduction to an unjustly marginalized thinker who has much to teach us about the human condition after the crises of the twentieth century.

This book is designed to offer a comprehensive high level introduction to transhumanism, an international political and cultural movement that aims to produce a paradigm shift in our ethical and political understanding of human evolution. Transhumanist thinkers want the human species to take the course of evolution into its own hands using advanced technologies currently under development such as robotics, artificial intelligence, biotechnology, cognitive neurosciences and nanotechnology to overcome our present physical and mental limitations, improve our intelligence beyond the current maximum achievable level, acquire skills that are currently the preserve of other species, abolish involuntary aging and death and ultimately achieve a post human level of existence. The book covers transhumanism from a historical, philosophical and scientific viewpoint, tracing its cultural roots, discussing the main philosophical, epistemological and ethical issues and reviewing the state of the art in scientific research on the topics of most interest to transhumanists. The writing style is clear and accessible for the general reader but the book will also appeal to graduate and undergraduate students.
