this book introduces readers to a reconfigurable chip architecture for future wireless communication systems such as 5g and beyond the proposed architecture perfectly meets the demands for future mobile communication solutions to support different standards algorithms and antenna sizes and to accommodate the evolution of standards and algorithms it employs massive mimo detection algorithms which combine the advantages of low complexity and high parallelism and can fully meet the requirements for detection accuracy further the architecture is implemented using asic which offers high energy efficiency high area efficiency and low detection error after introducing massive mimo detection algorithms and circuit architectures the book describes the asic implementation for verifying the massive mimo detection in turn it provides detailed information on the proposed reconfigurable architecture the data path and configuration path for massive mimo detection algorithms including the processing unit interconnections storage mechanism configuration information format and configuration method

this book constitutes the refereed proceedings of the international workshop on prostate cancer imaging held in conjunction with miccai 2011 in toronto canada in september 2011 the 15 revised full papers presented together with 2 invited talks were carefully reviewed and selected from 19 submissions the papers cover the clinical areas of radiology radiation oncology and image guided intervention addressing topics such as prostate segmentation multi modal prostate registration and computer aided diagnosis and classification of prostate cancer

this volume chronicles the proceedings of the symposium on particles on surfaces detection adhesion and removal held under the auspices of the fine particle society in san francisco july 28 august 2 1986 the study of particles on surfaces is extremely important in many areas of human endeavor ranging from microelectronics to optics to biomedical a complete catalog of modern precision and sophisticated technologies where particles on surfaces are of cardinal importance will be prohibitively long but the following eclectic examples should underscore the concern about particles on a variety of surfaces in the semiconductor world of shrinking dimensions particles which a few years ago were cosmetically undesirable but functionally innocuous can potentially be killer defects now as the device sizes get smaller there will be more and more concern about smaller and smaller particles in the information storage technology the gap between the head and the disk is very narrow and if a particle is trapped in the gap that can have very grave consequences the implications of particulate contamination on sensitive optical surfaces is all too manifest so the particulate contamination on surfaces is undesirable from functional yield and reliability points of view this symposium was organized with the following objectives in mind to bring together active practitioners in this field to provide a forum for discussion of the latest research and development activities in this area to provide opportunity for cross pollination of ideas and to highlight topics which needed intensified effort

this book shows how behavior analysis can be applied to teaching reading and writing to primary school students and to special populations such as children with intellectual and hearing disabilities and illiterate adults originally published in portuguese this contributed volume is now translated into english and presents for the first time to international researchers and students a comprehensive overview of a research program developed for more than three decades in brazil which gave birth to a unique teaching program based on the concept of stimulus equivalence the learning to read and write in small steps the book is divided into four parts the first part presents the theoretical framework and the historical context in which the teaching program was developed by the group led by drs julio cesar de rose and deisy das graças de souza currently organized in the national institute of science and technology on behavior cognition and learning inct ecce the second part describes the modules that make up the learning to read and write in small steps teaching program the third part presents results of empirical research conducted with

children with intellectual and hearing disabilities and illiterate adults finally the fourth part presents contributions from other areas of knowledge such as speech therapy linguistics and education to the understanding of reading and writing and possible dialogues between them and behavior analysis contributions of behavior analysis to reading and writing comprehension will be of interest to researchers and students in the fields of psychology and education interested in the application of behavior analysis to teaching and learning processes it will also be a valuable resource for professionals directly working in educational institutions such as elementary school teachers and psycho pedagogues the translation of the original manuscript in portuguese was done with the help of artificial intelligence the present version has been revised technically and linguistically by the authors in collaboration with a professional translator

in the last two decades there have been significant developments in membrane filtration processes for the dairy and beverage industries the filtration systems can be classified into four main groups reverse osmosis nanofiltration ultrafiltration and

microfiltration the primary objective of this book is to assess critically the pool of scientific knowledge available to the dairy and beverages industry as a tool for process and product innovation quality improvement and safety the book is divided into three main parts part i reviews the principals developments and designs of membrane processes that are mainly used in commercial dairy and beverage applications part ii provides information on the applications of membrane processes in the manufacture of dairy products from on farm concentration of milk as a pre treatment for cheesemaking to fractionation of milk and whey to provide ingredients for food and other applications part iii considers membrane applications during the manufacture of fruit juices beer and cider wine and vinegar these include concentration deacidification and dealcoholisation processes membrane processing dairy and beverages applications is an ideal new reference for dairy and beverage processors involved in the application of membranes both to aid the creation of novel products and to improve their process economics students and lecturers of food and dairy science and technology will value its in depth discussion of membrane processes whilst readers based in the dairy industry will prize it as the most up to date and advanced volume yet published on this crucially important topic

a revolutionary collaborative approach to design and construction project delivery integrating project delivery is the first book length discussion of ipd the emergent project delivery method that draws on each stakeholder s unique knowledge to address problems before they occur written by authors with over a decade of research and practical experience this book provides a primer on ipd for architects designers and students interested in this revolutionary approach to design and construction with a focus on ipd in everyday operation coverage includes a detailed explanation and analysis of ipd guidelines and case studies that show how real companies are applying these guidelines on real world projects end of chapter questions help readers quickly review what they ve learned and the online forum allows them to share their insights and ideas with others who either have or are in the process of implementing ipd themselves integrating project delivery brings together the owners architect engineers and contractors early in the development stage to ensure that problems are caught early and to address them in a collaborative way this book describes the parameters of this new more efficient approach with expert insight on real world implementation compare traditional procurement with ipd understand ipd guidelines and how they re implemented examine case studies that illustrate everyday applications communicate with other ipd adherents in the online forum the ipd approach revolutionizes not only the workflow but the relationships between the stakeholders the atmosphere turns collaborative and the team works together toward a shared goal instead of viewing one another as obstructions to progress integrated project delivery provides a deep exploration of this approach with practical guidance and expert insight

the gender differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the

international community as demonstrated by UN Security Council resolution UNSCR 1325 on women, peace and security and subsequent resolutions. Similarly, the development community has identified gender-differentiated impacts upon women and girls as a result of the effects of climate change. Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict, but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict. Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at-risk population groups such as women and girls. Armed conflict, women and climate change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian-centric operations in situations of humanitarian relief, peacekeeping and even armed conflict. This book examines strategy and military doctrine from NATO, the UK, US and Australia and explores key issues such as displacement, food and energy insecurity and male out-migration as well as current efforts to incorporate gender considerations in military activities and operations. This innovative book will be of great interest to students and scholars of international relations, international development, international security, sustainability, gender studies and law.

The book features original papers from the International Conference on Cryptology, Network Security with Machine Learning (ICCNsml 2023) organized by PSIT Kanpur, India, during 27-29 October 2023. This conference proceeding provides the understanding of core concepts of cryptology and network security with ML in data communication. The book covers research papers in public key cryptography, elliptic curve cryptography, post-quantum cryptography, lattice-based cryptography, non-commutative ring-based cryptography, cryptocurrency authentication, key agreement, hash functions, block stream ciphers, polynomial-based cryptography, code-based cryptography, NTRU cryptosystems, security and privacy in machine learning, blockchain, IoT security, wireless security protocols, cryptanalysis, number theory, quantum computing, cryptographic aspects of network security, complexity theory and cryptography with machine learning.
