originally emanating from presentations at an international conference this text brings together research and practice development from three perspectives practice management and education within these three sections the book presents a series of chapters written mainly by practitioners but some in collaboration with academics at the end of each section there is a commentary by a practitioner manager or researcher which aims to offer a helpful critique on the papers in their section guiding the reader to consider other areas of research and practice development at a time when practitioners are being called to produce and use evidence in their practice this book should offer a valuable contribution to that evidence base

cancer nursing principles and practice eighth edition continues as the gold standard in oncology nursing with contributions from the foremost experts in the field it has remained the definitive reference on the rapidly changing science and practice of oncology nursing for more than 25 years completely updated and revised to reflect the latest research and developments in the care of patients with cancer the eighth edition includes new chapters on the biology of cancer sleep disorders and palliative care across the cancer continuum the eighth edition also includes significant updates to the basic science chapters to reflect recent increases in scientific knowledge especially relating to genes and cancer also heavily revised are the sections devoted to the dynamics of cancer prevention detection and diagnosis as well as treatment oncologic emergencies end of life care and professional and legal issues for oncology nurses

the field of oncology benefits from several large scale reference books and a host of monographs dedicated to specific cancers however truly excellent practice and review books are surprisingly quite scarce outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question and answer format there are no resources that offer a robust engaging fully referenced tool for these vital activities in every oncologist s and oncology trainee s work this print and electronic book seeks to fill that void offering comprehensive question and answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well balanced selection of common and uncommon cancers at the heart of this book is the editor s and authors desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data in every section the user is guided toward collaboration in ongoing

clinical research for example via discussions of well designed ongoing clinical trials in each specific area developed with both the teacher and learner in mind this book also offers trainees and fellows an excellent opportunity to enhance their preparation for the abim oncology fellowship exam as well as for the oncology boards it will also be an extremely useful tool for oncologists working toward the recertification exam this comprehensive beefy book includes hundreds of painstakingly developed multiple choice and mini case based questions covering the principles of medical oncology malignant hematology surgical oncology and radiation oncology it also contains mini cases and questions dealing with the biology diagnosis classification staging and multidisciplinary treatment of cancers at every anatomic site the very latest topics are included such as molecular techniques targeted therapies and translational cancer research concise but detailed answers are referenced to key journals and books and evidence based wherever possible nccn guidelines are also referenced as appropriate with its powerful focus on take home messages from and for actual clinical work this book will help keep oncologists up to date bridging the gaps between journal and reference literature conferences and their existing knowledge base
