globalization has a profound effect on the mission and goals of education worldwide one of its most visible manifestations is the worldwide endorsement of the idea of education for global citizenship which has been enthusiastically supported by national governments politicians and policy makers across different nations increasingly the educational institutions feel under pressure to respond to globalization forces by preparing students to engage competitively and successfully with this new realm lest their nations be left in the dust what is the role of international schools in implementing the idea of education for global citizenship how do these schools create a culturally unbiased global curriculum when the adopted models have been developed by western societies and at the very least are replete with western cultural values traditions and biases this collection of essays attempts to grapple with these complex issues while highlighting that culture and politics closely intertwine with schooling and curriculum as parents administrators teachers and students of different backgrounds and interests negotiate definitions of self and each other to construct knowledge in particular contexts the goal is to examine the

complexity of factors that drive the global demand for education for global citizenship and deconstruct the contested nature of global citizenship by examining how the phenomenon is understood, interpreted and modified in different cultural settings, the authors provide not only a thick description of their cases but also a critical assessment of various attempts to initiate and implement educational reforms aimed at the development of globally minded citizens in various national settings.

You can make large profits by trading commodities but you'll need significant practical knowledge of the associated risks and market characteristics before you start. A trader's first book on commodities is a simple, practical and useful guide for new commodities traders. Author Carley Garner provides specific guidance on accessing commodity markets, cost-effectively avoiding common beginners' mistakes and improving the odds of successful, profitable trades. Drawing on her extensive experience teaching traders, Garner shows how to calculate profit/loss and risk in commodities and choose the best brokerage firm, service level, data sources and market access for your needs. She'll help you master the basics of trading commodities painlessly, avoiding beginners' mistakes, get what you need and prevent paying for what you don't need. Know what you're buying, what it costs, the returns you're earning and the risk you're taking. Predict price, manage risk and make trades that reflect your analysis. Garner demystifies the industry's colorful language, helps you clearly understand what you're buying and selling and walks you through the entire trading process. She concludes with a refreshingly new look at topics such as trading plans, handling margin calls and even maintaining emotional stability as a trader. This book provides the type of information every trader needs to know and the type of information too many traders had to learn the hard and expensive way. Carley offers practical, need-to-know, real-world trading tips that are lacking in many books on futures. It will help not only the novice trader but seasoned veterans as well. This book will serve as a must-have reference in every trader's library. Phil Flynn, vice president and senior market analyst at PFG Best Research and a Fox Business Network contributor. Refreshing! It's nice to see a broker who has actually been exposed to the professional side of trading and who bridges that chasm between exchange floor trading and customer service. Carley takes the time to explain verbiage, not just throw buzz words around. A good educational read. In my opinion, Don Bright, Director, Bright Trading LLC. This book has the perfect name, the perfect message and the necessary information for any beginning trader. Take this book home.
